# How to Log In to cPanel and Change Its Password

Services and Email · https://www.hyyat.com/en/knowledgebase/access-cpanel-from-client-area/

> **In short:** You open cPanel from the client area without a password: Services → My Services → your hosting → "Log in to cPanel". The same page has "Change Password" for the cPanel password, and "Log in to Webmail" for your email.

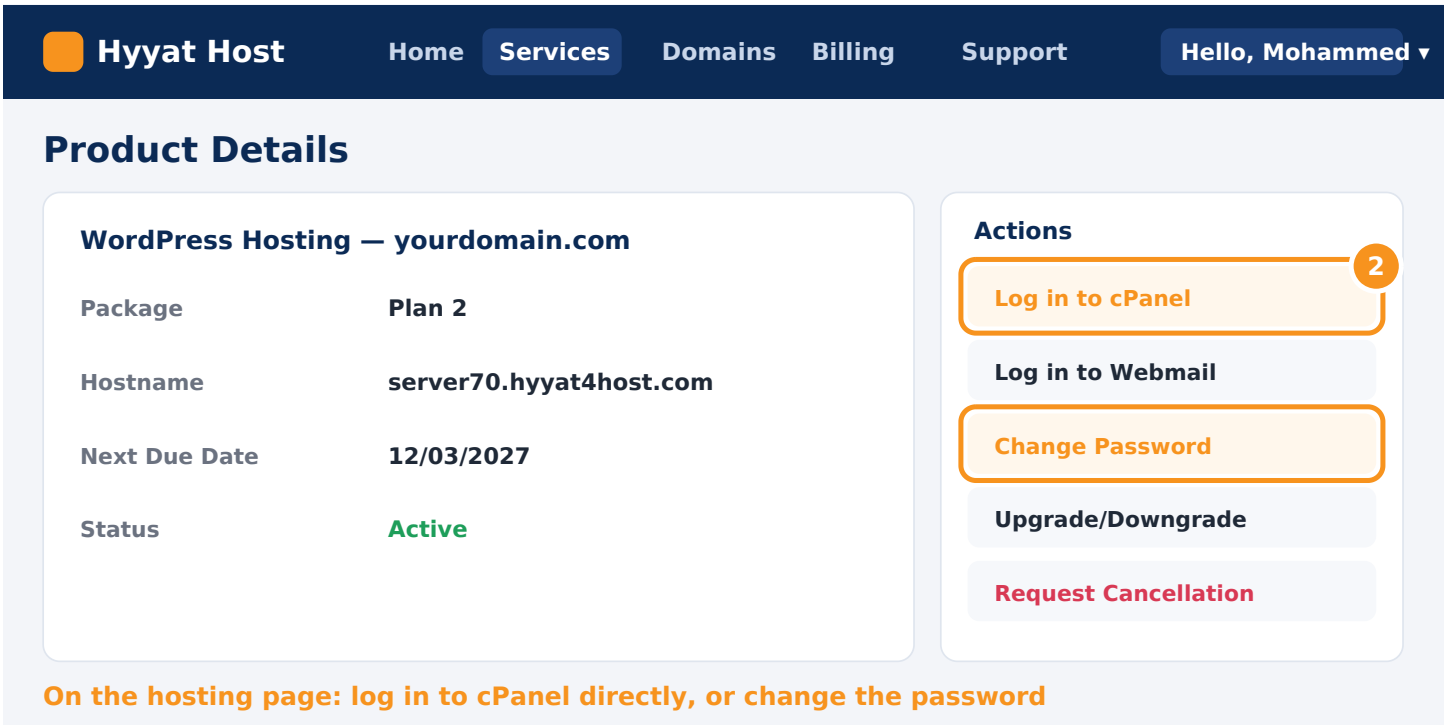

**Short video (23 seconds)**

cPanel is your website control panel: files, email, databases, backups and subdomains. The easiest way in is from the client area, which logs you in directly with no username or password.

## Logging in to cPanel

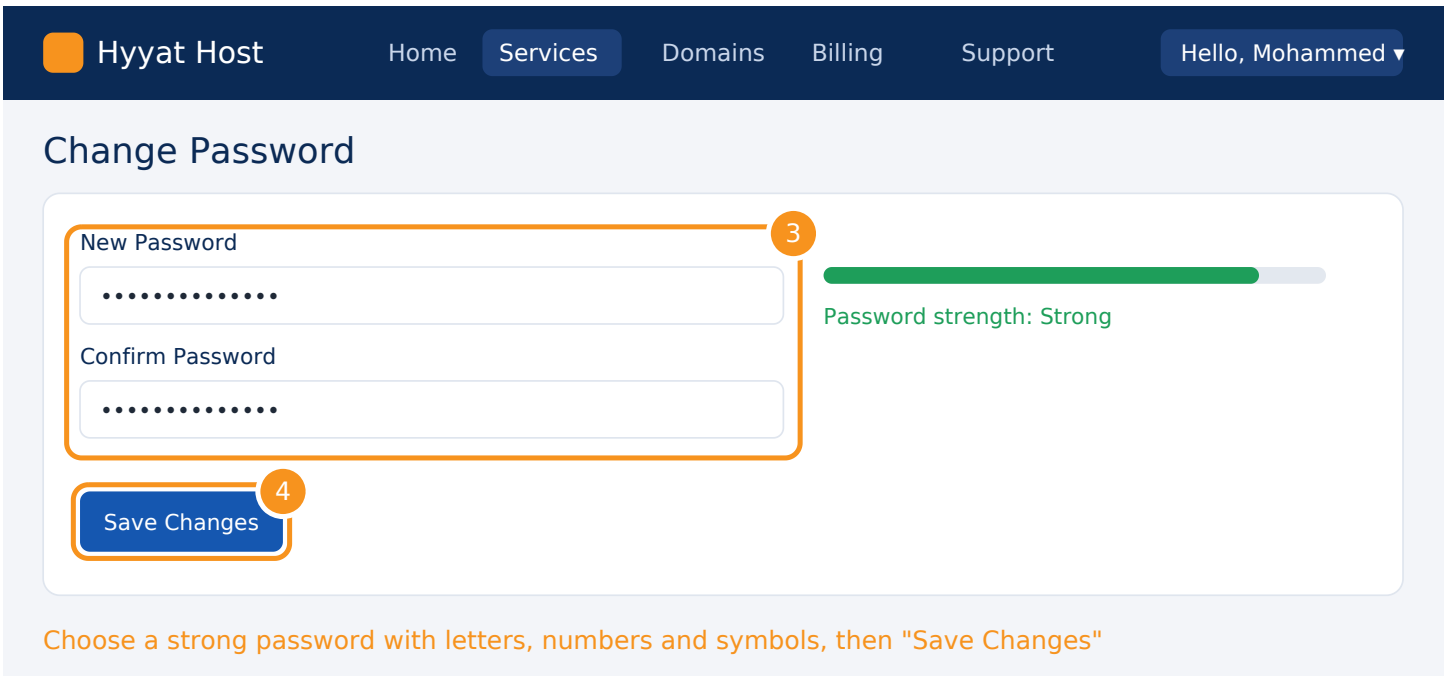

1. Log in to the client area with your email and password, or with the Google account linked to it.
2. Open Services → My Services and click your hosting plan.
3. In the **Actions** box click **Log in to cPanel**.

The same page shows your account **Hostname**, sometimes needed to set up email or upload files.

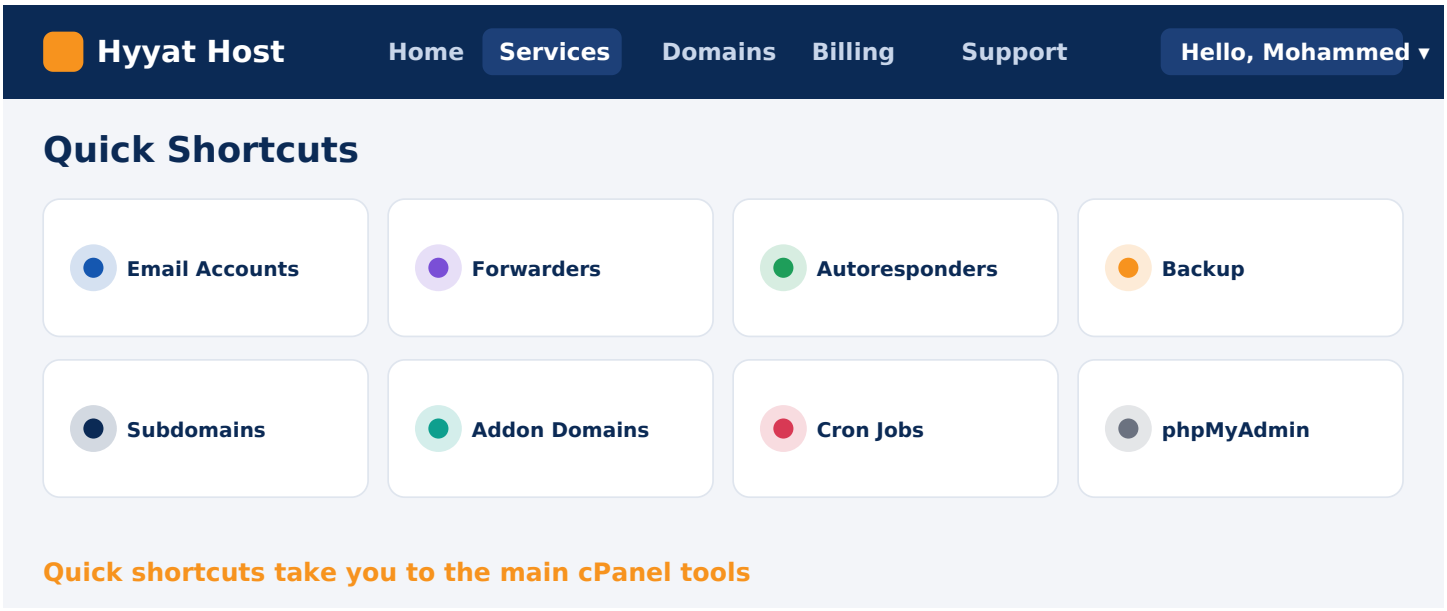

## Changing the cPanel password

1. On the hosting page click **Change Password**.
2. Enter and confirm the new password, then click **Save Changes**.

**Strong password:** avoid your phone number or name; use upper and lower case letters, numbers and symbols. cPanel controls your whole site and you are responsible for your account, so never share its password; use User Management if someone else needs access.

## Main cPanel tools

| Tool | Use |
| --- | --- |
| Email Accounts | Create mailboxes and change passwords. See webmail and email passwords. |
| File Manager | Upload and edit website files. |
| Backup | Download a copy of your site, email and databases. |
| Subdomains and Addon Domains | Add blog.yourdomain.com or another domain to the same hosting. |
| Zone Editor | Edit DNS records for a domain on this hosting. See DNS records. |
| phpMyAdmin | Manage databases. |

# FAQ

## Can I open cPanel directly?

Yes, at `https://yourdomain.com:2083` with the username and password from your welcome email, found in Email History.

## The login button does not work?

If the service is "Suspended", pay the overdue invoice first. Otherwise open a ticket in Hosting Support.

## Does it change mailbox passwords?

No. Each mailbox has its own password.

## I need a bigger plan.

See upgrading your plan.
