Need professional email for your company? Hyyat Host business hosting gives you your website plus unlimited email accounts on your domain (such as info@company.com) from $77/year, with a higher sending limit, free migration of your current email and support that replies within 24 hours. Compare hosting types.

According to MailScanner, all my emails are being marked as "not spam".

If all the emails to your domain name are being marked as "Whitelisted" by MailScanner (this will appear in the email headers), the most liekly explanation of this is that you have added your own domain name as a "Whitelisted" entry within MailScanner. When you add a domain name or email address to the whitelist, all mail both TO or FROM that domain name will be marked as white listed and not marked as spam.

Greetings from the Hyyat Host team
