Log In to the Client Area with Google

Account and Security · https://www.hyyat.com/en/knowledgebase/client-area-login-google-facebook/

In short: You can log in to the client area with your Google account instead of typing a password. Link Google once from: Hello → Security Settings → Linked Accounts, then use "Sign in with Google" on the login page. Logging in with email and password still works.

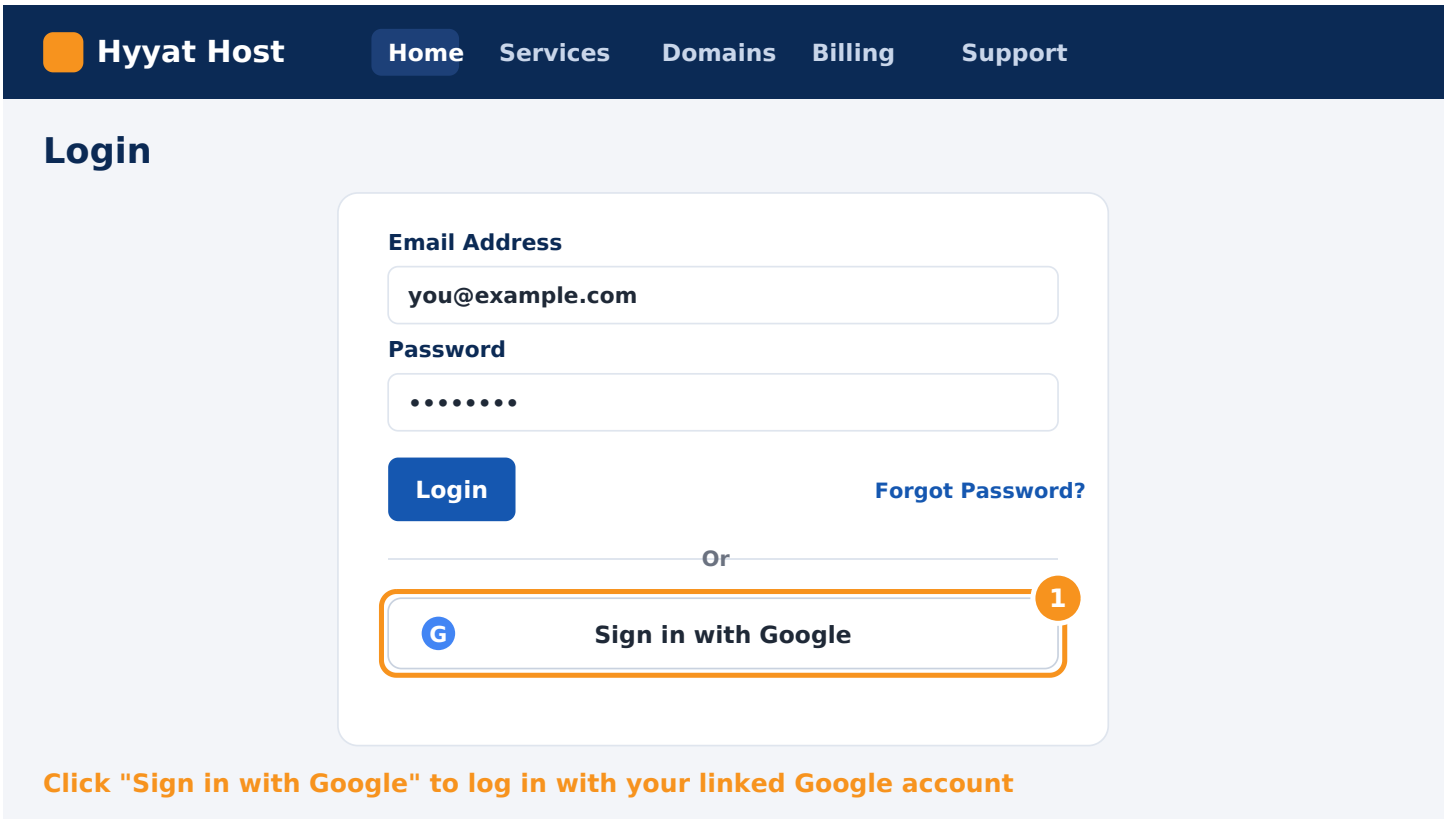
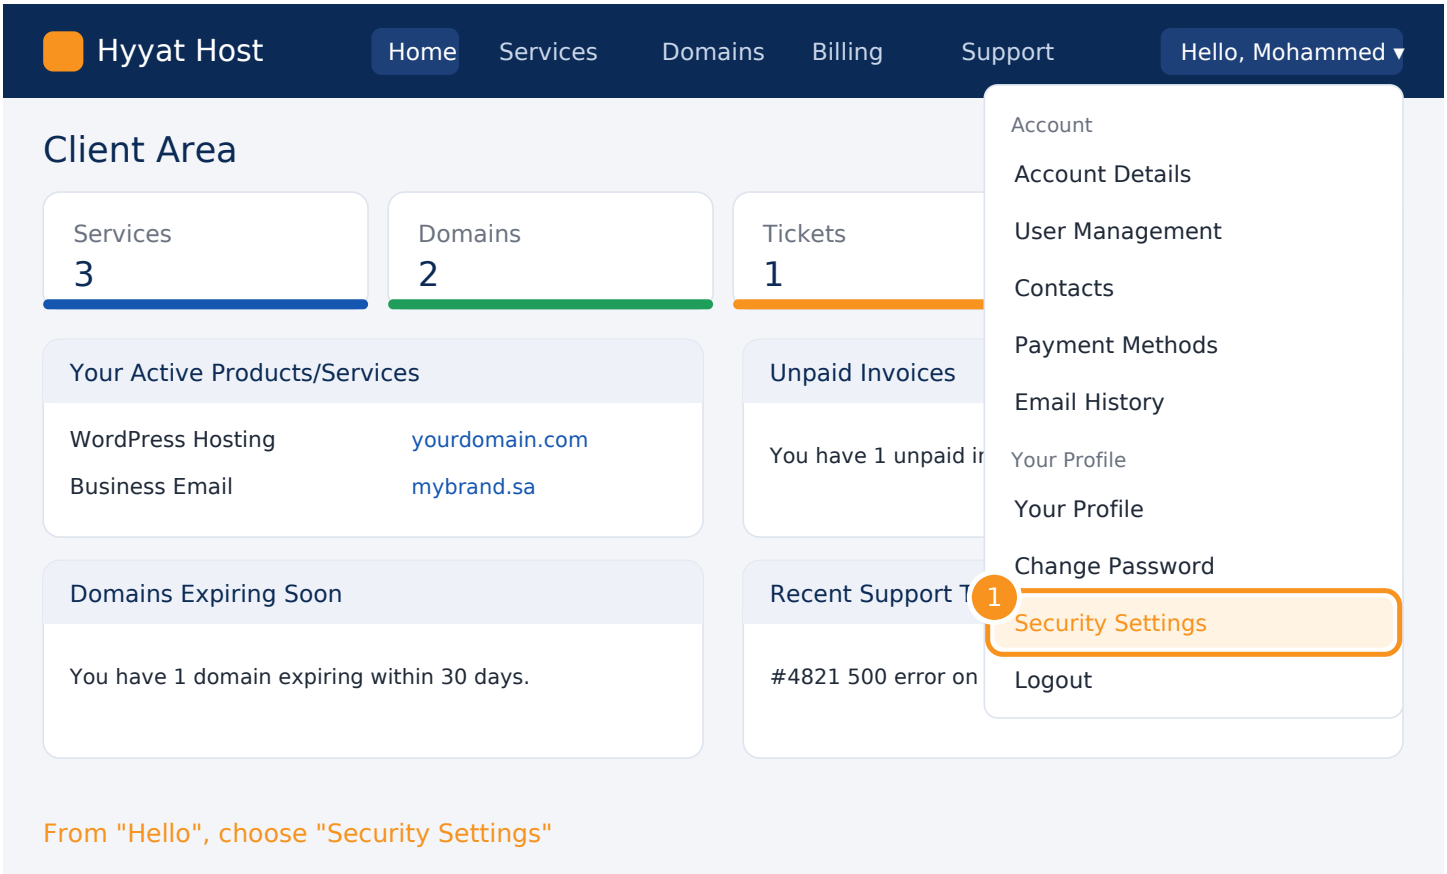
Logging in with Google



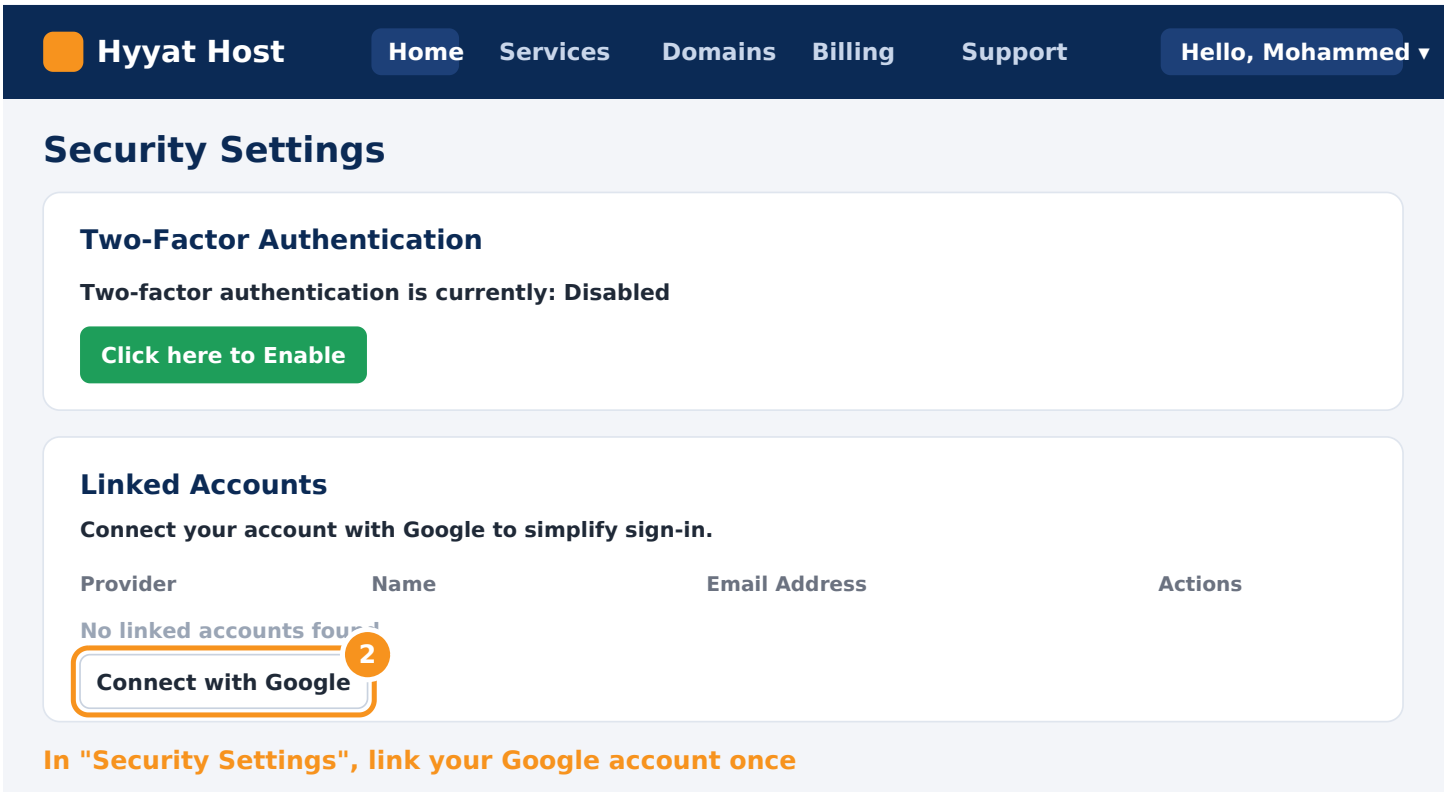
On the login page click **Sign in with Google** and choose your Google account. If it is linked to your account, you log in straight away. If not, you are asked to log in once with your email and password to link it.

Link or unlink your Google account

1. Log in, and from the **Hello** menu at the top choose **Security Settings**.



1. Under **Linked Accounts** click **Connect with Google** and choose your account. A message confirms it is linked.
2. To unlink, click the remove button next to the linked account in the same section, and confirm.



Linked Facebook or Twitter before? Those logins are no longer available. Log in with your email and password, or reset your password if you forgot it, then link Google if you like.

FAQ

Is Google login safe?

Yes. We never get your Google password; the link is used only to sign you in. For more security, turn on two-factor authentication.

It says the account is linked to another client.

This Google account is linked to another client account. Choose a different Google account, or open a support ticket.

Does linking change my account email?

No. Your account email stays the same.

Can I create an account with Google?

Accounts are created with your first order. See how to get an account.
