How to Change a cPanel Account Password from WHM

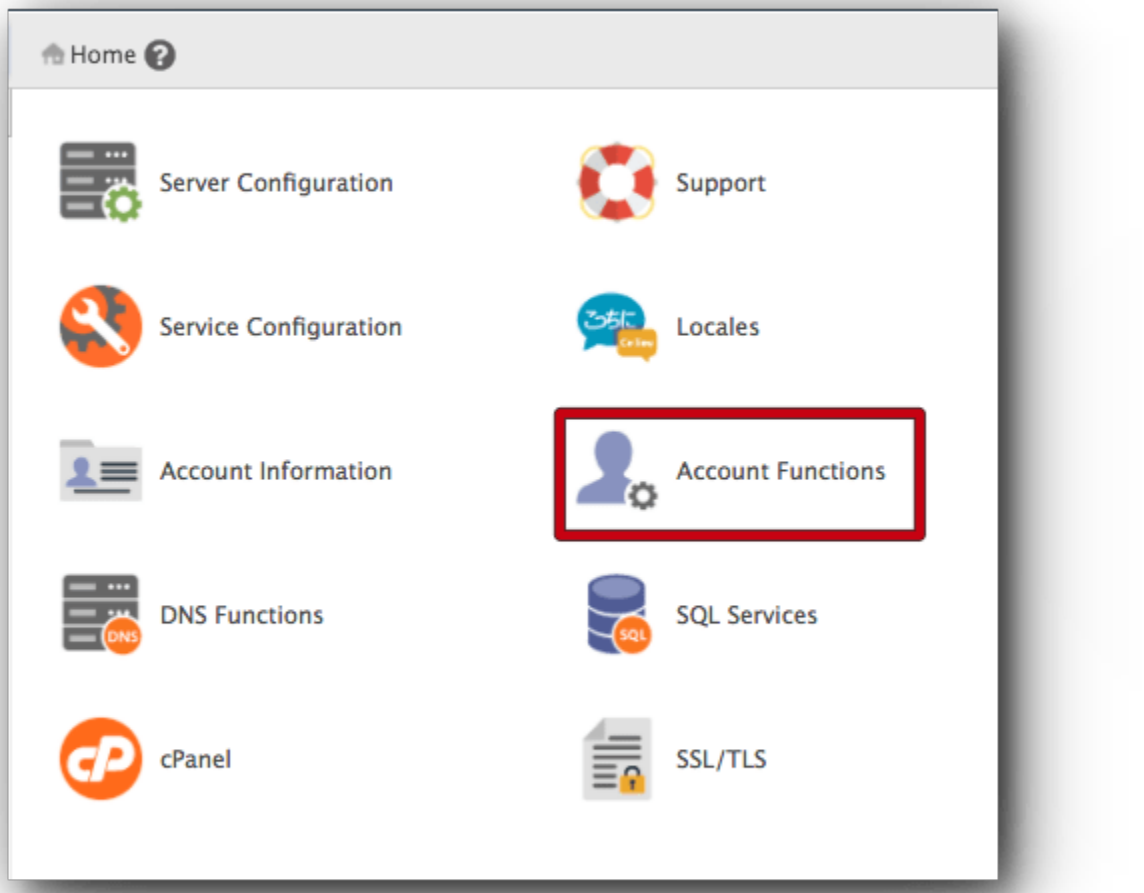

whm/cpanel control panels · https://www.hyyat.com/en/knowledgebase/change-cpanel-password-whm/

In short: To change a cPanel account password from WHM: go to Account Functions, then Password Modification. Select the account, type a new password or use the Password Generator, and click Change Password.

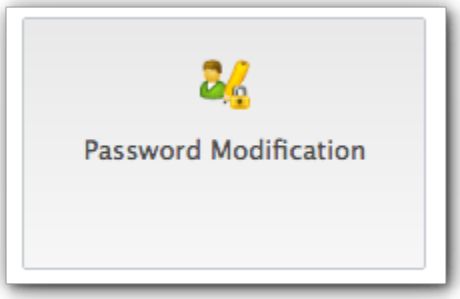

1. Log in to WHM at **https://your-server-ip:2087** with your username and password.

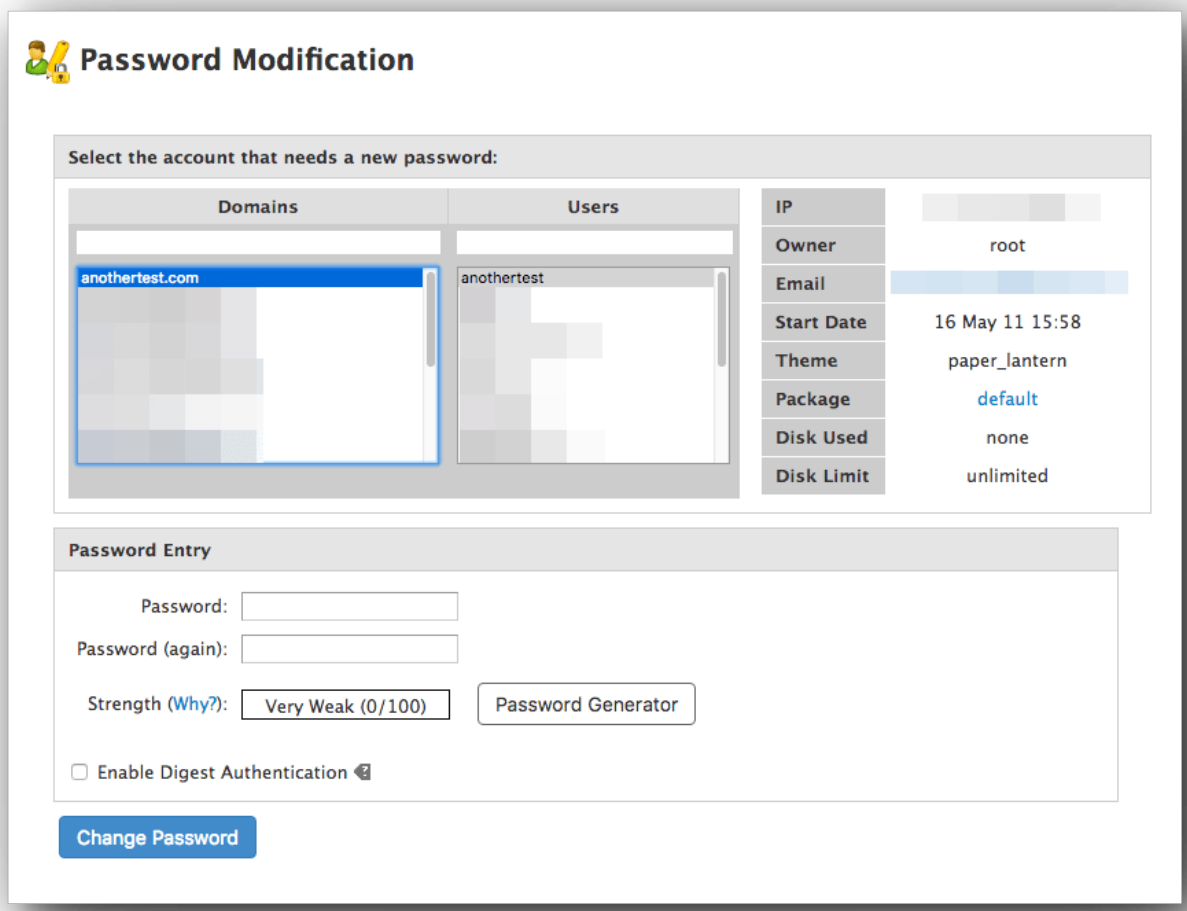

2. Go to **Account Functions**.

3. Click **Password Modification**.

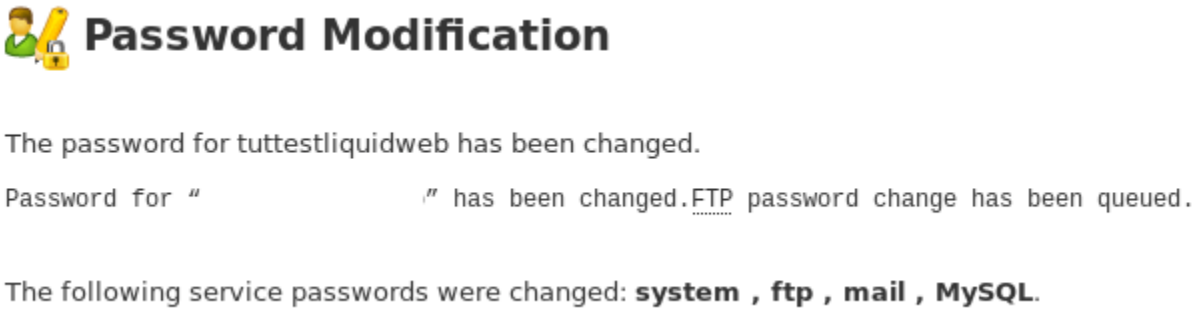

4. Select the user (account) whose password you want to change.

5. Enter the new password (use a strong one, or click Password Generator) and click **Change Password**.

6. A confirmation message appears at the bottom.
