How to Change the Server Time Zone in WHM

whm/cpanel control panels · https://www.hyyat.com/en/knowledgebase/change-server-timezone-whm/

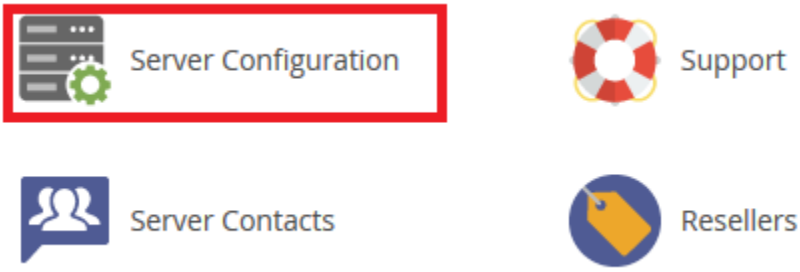

In short: To change your server's time zone in WHM: go to Server Configuration, then Server Time, choose the time zone from the drop-down list and click Change TimeZone. If the clock is wrong, click Sync Time with Time Server. The correct time matters when you read system logs.

Setting the correct server time helps you know exactly when a problem happened when you read the system log files, and when someone logged in to the server.

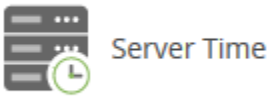

1. Log in to WHM at **https://your-server-ip:2087** with your username and password.

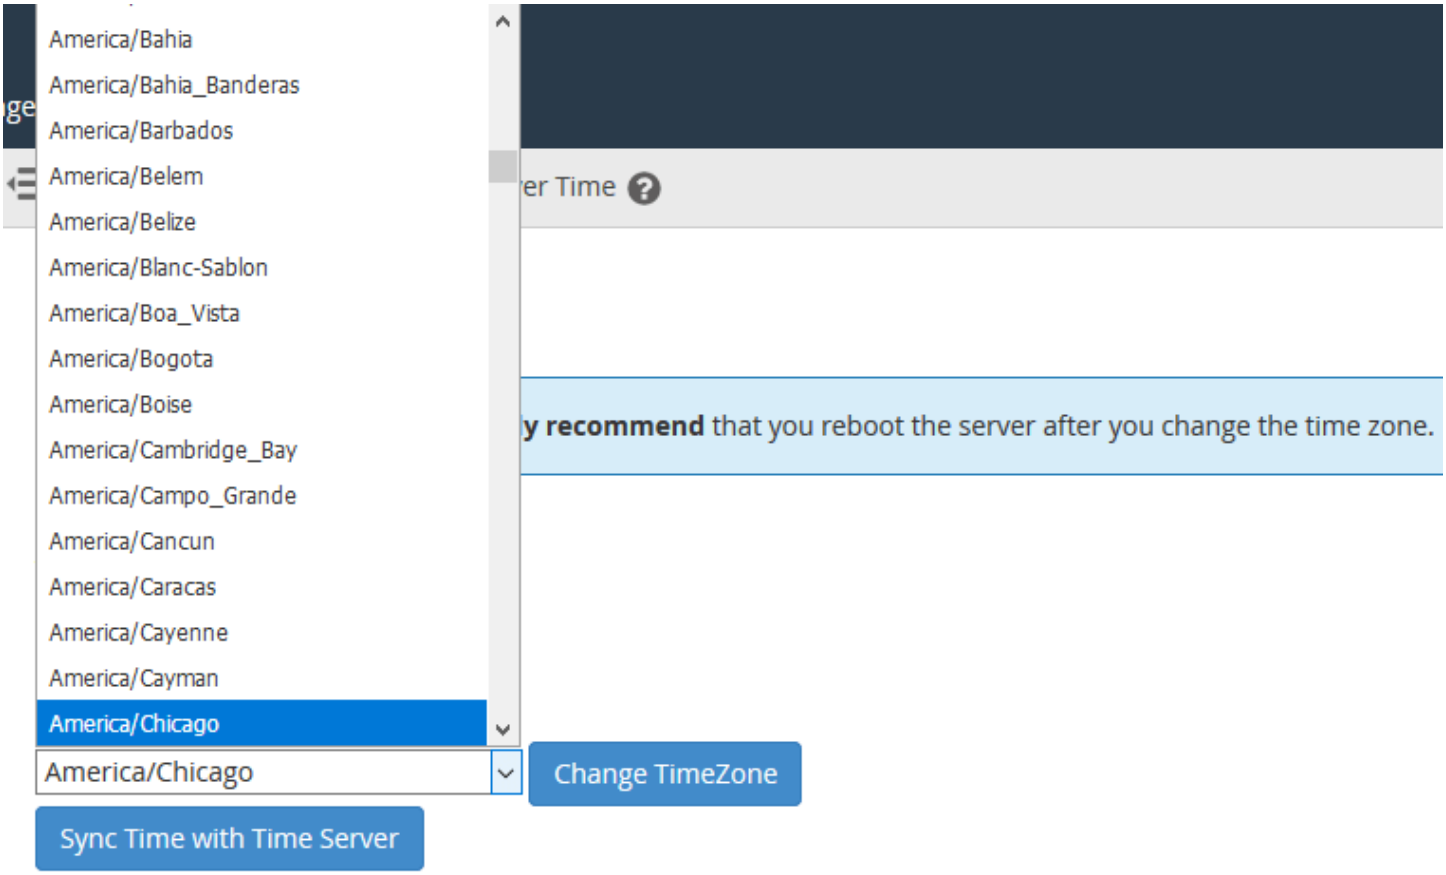

2. Click **Server Configuration**.

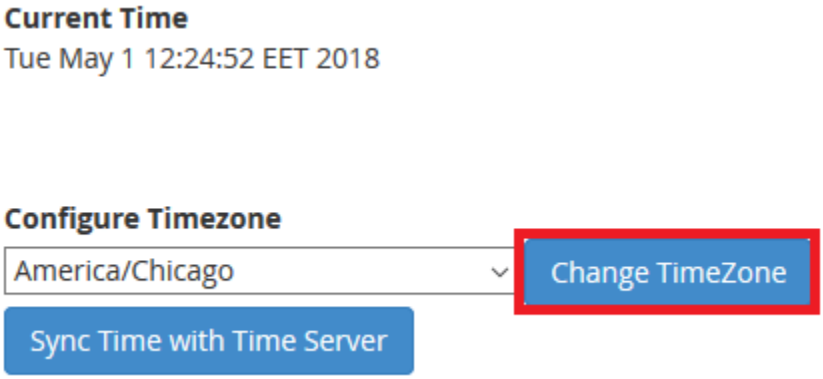

3. Click **Server Time**.

4. Choose the time zone you want from the drop-down list.

5. Click **Change TimeZone**.

Note: if the time is still not correct, click **Sync Time with Time Server**.
