Create a snapshot of the storage box from the client area

Storage Box · https://www.hyyat.com/en/knowledgebase/create-a-snapshot-of-the-storage-box-from-the-client-area/

Create a snapshot of the storage box from the client area

introduction

With the Snapshot function, you can create an image of the content of your Storage Box; this will enable you to perform a recovery of the content, if needed, in a short time.

We will explain how to create a snapshot of the storage box from the client area **Hyyat Host**

1- We log in through the client area through the following link

client area

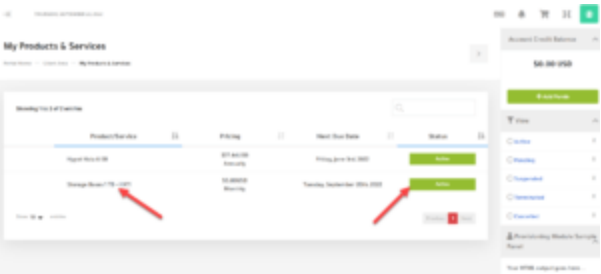

We enter our email and password

2- After logging in, we go to the services and click on them to show us the services that we have subscribed to

3- After our services appear, we click on Storage Boxes until we enter and control the service

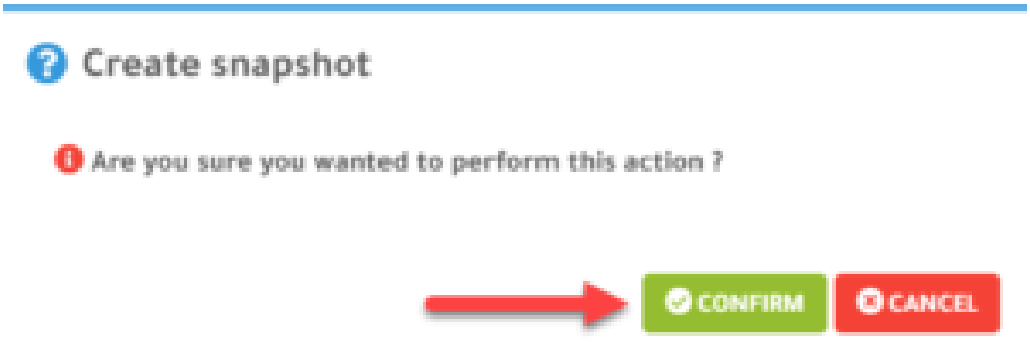

4- After entering the storage box service, the control panel will appear in the storage box, and this is what we will explain in the upcoming lessons.

5- To create a snapshot from the storage box, we click on Create Snapshot and then click on Confirm

Action Completed Succeessfully

6- To show the information of the snapshot that was taken, we will scroll down. We will find all the snapshots with dates

Add or edit a description

scan the snapshot

restore shots

Please note: that when you restore an earlier snapshot, all newer snapshots will be deleted
