What is a storage box?

Introduction

Storage boxes from Hayat Host provide a safe and convenient way to store your data in multiple data centers.

With our storage boxes, you can access your files anytime and anywhere with an internet connection. It's also easy to connect the storage boxes to your drive on your computer and access the storage boxes with your smartphone and/or tablet. Live Host online storage boxes work with a variety of standard protocols, which are supported by a wide range of applications.

We have different options for storage boxes, so you can choose the best one for your specific needs. And you can always upgrade your storage box or downgrade.

Order You can order storage boxes using the customer area or through the following link

Reliability

Your files on storage boxes are protected with a RAID configuration that can withstand many drive failures. Therefore, there is a relatively small chance of data loss.

IMPORTANT WARNING: YOU, THE CUSTOMER AND MANAGER, ARE RESPONSIBLE FOR YOUR DATA; There is no guarantee from Life Host regarding potential data loss. The data is not mirrored to other servers. In addition, checksums for individual blocks of data are used to detect and correct bit errors.

general information

The speed with which your data can be transferred to the storage box depends on the number of connections you make and your internet speed

The /etc and /lib directories cannot be created on Storage Boxes. There is a limit of 10 connections per storage box account.

promotions and discounts

You can upgrade or downgrade to another "storage box" at any time without losing data. The access data remains the same. You can only downgrade to a smaller version of a Storage Box if you are using less space than is available in a smaller Storage Box.
