Securing your site with an **SSL** certificate puts it on **https**, protects visitor data and improves your search rankings. **Plesk** provides the **SSL It!** tool to issue a free Let's Encrypt certificate in a few clicks. In this guide from the Hyyat Host team we show the steps.

Hyyat Host virtual servers with NVMe storage, full control and Arabic support are a solid base for your secured sites.

Before you start you need a created site and a domain pointing to your server — see creating a website on Plesk.

Steps to issue the certificate

1. **Open the site** From `Websites & Domains` open your site.
2. **Open the SSL It tool** Click `SSL/TLS Certificates` or the `SSL It!` tool.
3. **Issue a free certificate** Click `Get it free` to issue a Let’s Encrypt certificate automatically.
4. **Enable https redirect** Turn on `Redirect from http to https`.

5. **Verify the padlock** Open your site over https and check the padlock appears.

The Let's Encrypt certificate auto-renews, and SSL It also lets you rate the certificate's security and enable HSTS and OCSP.

Common issues and fixes

- **Issuance fails:** most often the domain doesn't point to your server IP — fix the A record and retry.
- **Site shows «not secure»:** make sure https redirection is enabled.
- **Mixed content:** update image and file links to https.
