How to Get a Client Area Account

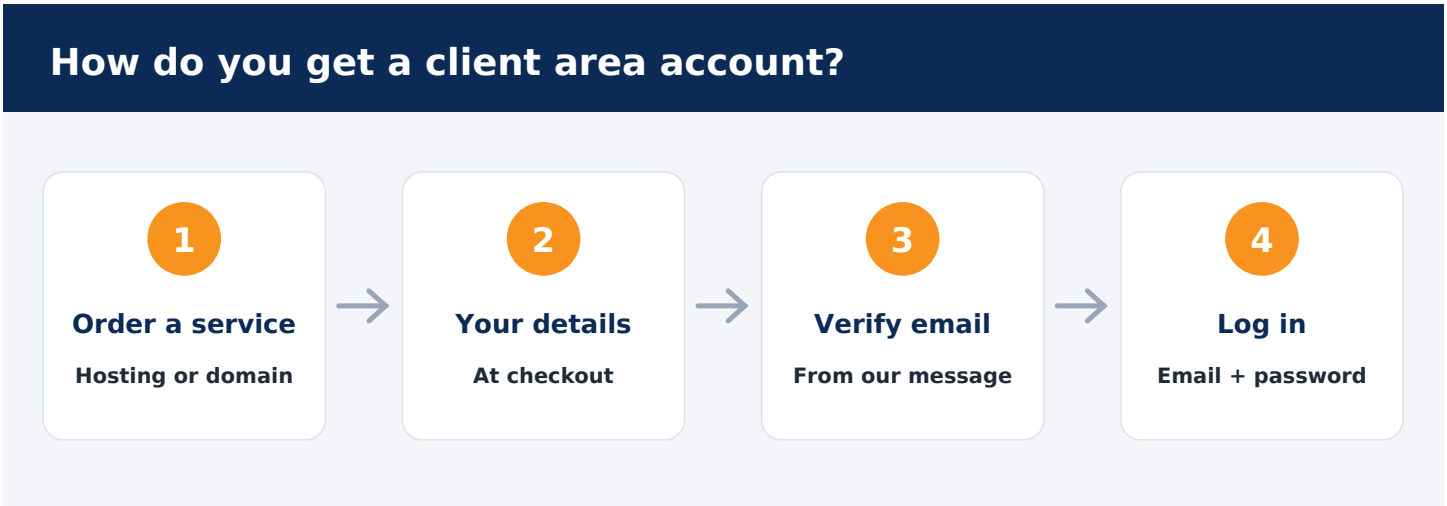

Account and Security · https://www.hyyat.com/en/knowledgebase/get-client-area-account/

In short: There is no separate sign-up: your client area account is created with your first order. Choose a service, select "new client" at checkout and fill in your details, then verify your email from the verification message. After that you log in with your email and password.

How do you get an account?

1. Choose the service you want on our website, such as hosting or a domain, or start from the order page.
2. At checkout choose **new client**, and enter your name, email, mobile number and a strong password. Use an email you check regularly: invoices and service details go there.
3. Complete the order and payment. Your account is created right away and a welcome email is sent.
4. Open the **Email Verification** message and click its link.

If the verification email does not arrive, log in and you will see a notice at the top with a button to resend it. Check your spam folder too.

Were you invited to manage an account?

If an account owner invited you from User Management, click the link in the invitation email and set your password. You then access their account with the permissions they chose, with no order needed.

Have a question before buying? Message us on WhatsApp and we will help you choose.

FAQ

Why is there no sign-up button?

Because the account is created with your first order, so there is no extra step and every account is tied to a real service.

I have an account; how do I log in?

See logging in to the client area. You can also log in with Google once linked.

Forgot your password?

See password recovery.

I have an account and want a new service.

Log in first and then order, or choose "existing client" at checkout, so all your services stay in one account.
