Install WordPress on DirectAdmin with Installatron — Step by Step 2026

DirectAdmin · https://www.hyyat.com/en/knowledgebase/install-wordpress-directadmin/

In short To install WordPress on DirectAdmin: open Installatron then WordPress and click Install, choose the domain and enter the admin details then Install. The installer creates the database and installs WordPress automatically.

Most **DirectAdmin** setups include the **Installatron** apps installer, which installs **WordPress** in one click with no manual file upload or database creation. In this guide from the Hyyat Host team we show how.

Hyyat Host virtual servers with NVMe storage, full control and Arabic support are an excellent base for WordPress sites.

Explore Hyyat Host VPS plans ←

Before you start you need a site created in the panel — see creating a website on DirectAdmin, with the panel installed per the DirectAdmin install guide.

Steps to install WordPress

1. **Open the installer** From the user panel open `Installatron Applications Installer`.
2. **Choose WordPress** From the apps list choose `WordPress` then `Install this application`.
3. **Choose the domain** Set the domain and path (leave empty for root) and the https protocol.

4. **Enter the admin details** Type the admin username, a strong password, email and site title.
5. **Install** Click `Install` and wait, then log in at /wp-admin.

Installatron creates the database and installs, and later offers one-click updates and backups for the WordPress site.

What next after installing?

- Issue a free SSL certificate and enable https — see issuing SSL on DirectAdmin.
- Install a caching plugin to speed up the site.
- Enable backups — see backups on DirectAdmin.

Common issues and fixes

- **Installatron not showing:** it may not be enabled — enable it from the admin level, or use Softaculous if installed.
- **Install fails:** make sure there are enough resources and the domain works.
- **Site opens with a white page:** check the PHP version and set it to 8.1 or newer.

Next step

- Issue a free SSL certificate and enable https.
- Enable backups from the start.
- See the VPS control panel comparison to learn each panel's strengths.

And if you'd like us to install and set up WordPress for you, open a support ticket — we reply within 24 hours at most.

Frequently asked questions

How do I install WordPress on DirectAdmin?

From Installatron choose WordPress and click Install, set the domain and admin details then Install.

Do I need to create a database manually?

No, Installatron creates and links the database automatically.

What if Installatron is not present?

Enable it from the admin level, or install WordPress manually by uploading files and creating a database.
