How to Power On Your Cloud Server from the Client Area

Explanations of use · https://www.hyyat.com/en/knowledgebase/power-on-cloud-server/

> **In short:** To start your cloud server after stopping it: client area, then Services, then My Products & Services, then your server, then Server Quick Actions, then Power On, then Confirm. A message confirms that the server is running.

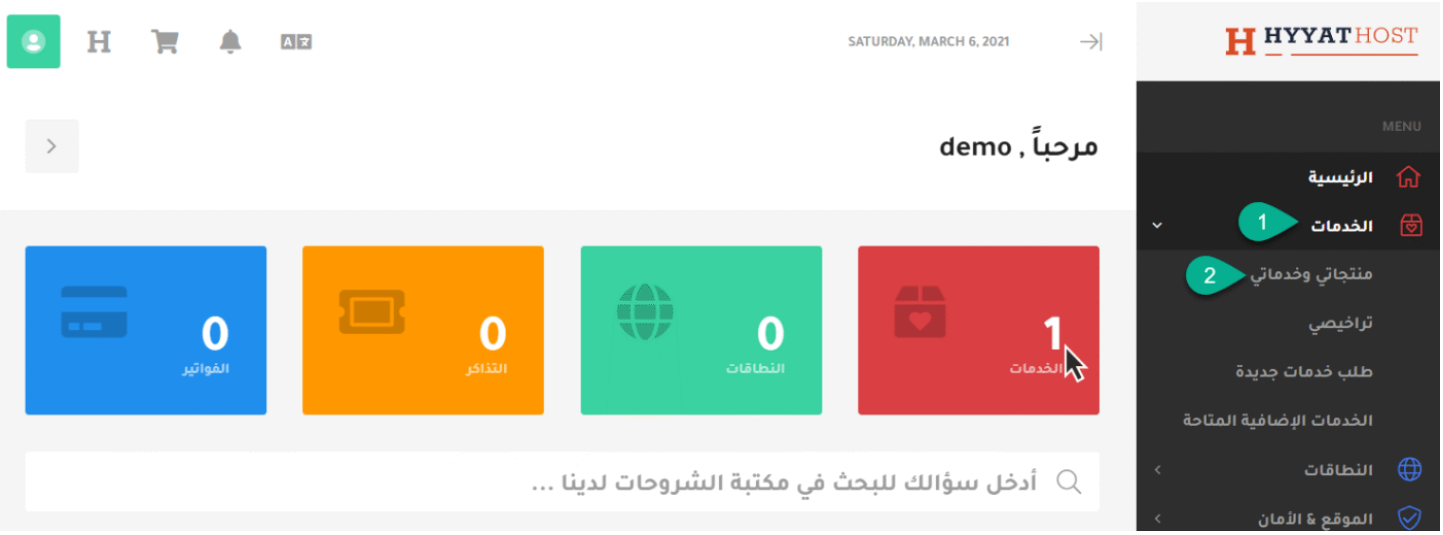

This guide shows how to start your cloud server again after you stopped it (see how to stop your cloud server).

Steps

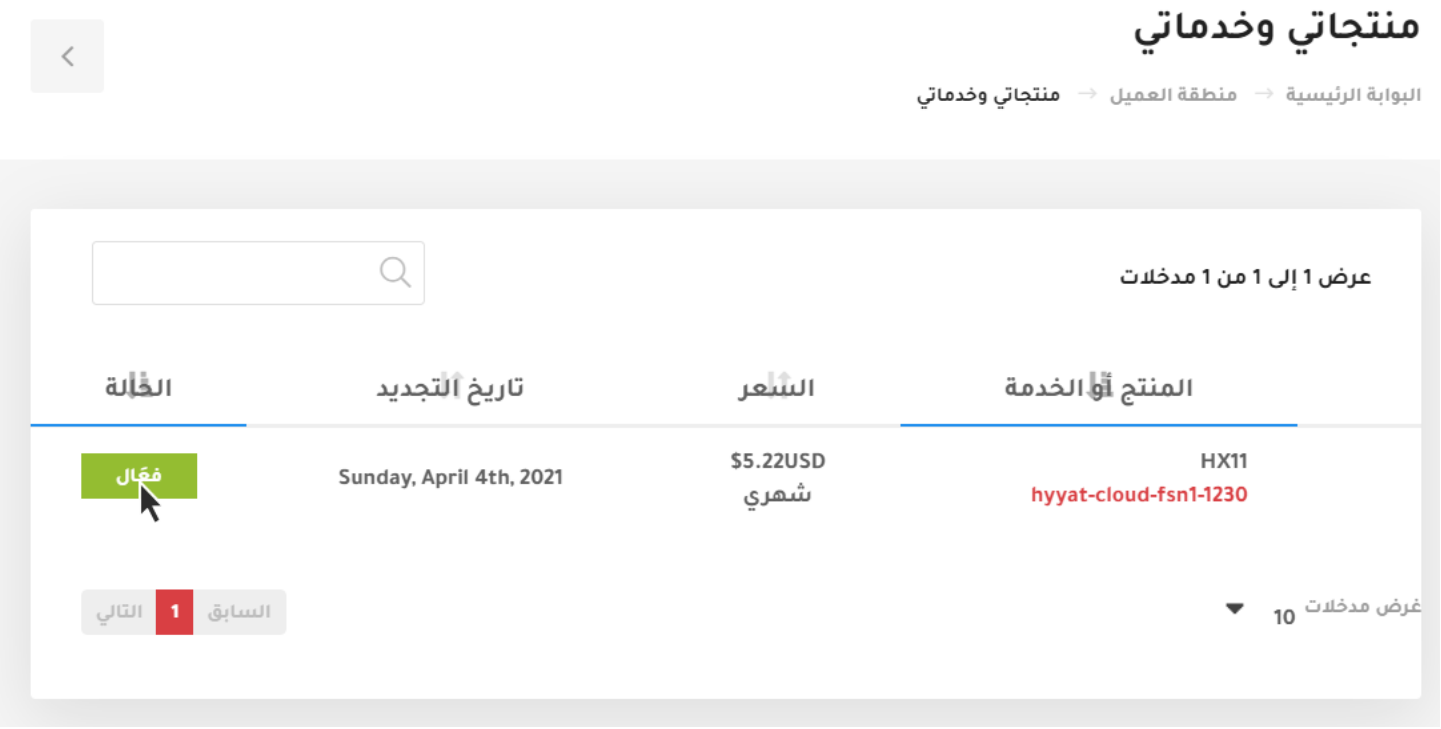

1. Log in to the client area. See how to log in to the client area.

2. Click **Services**, then **My Products & Services**.

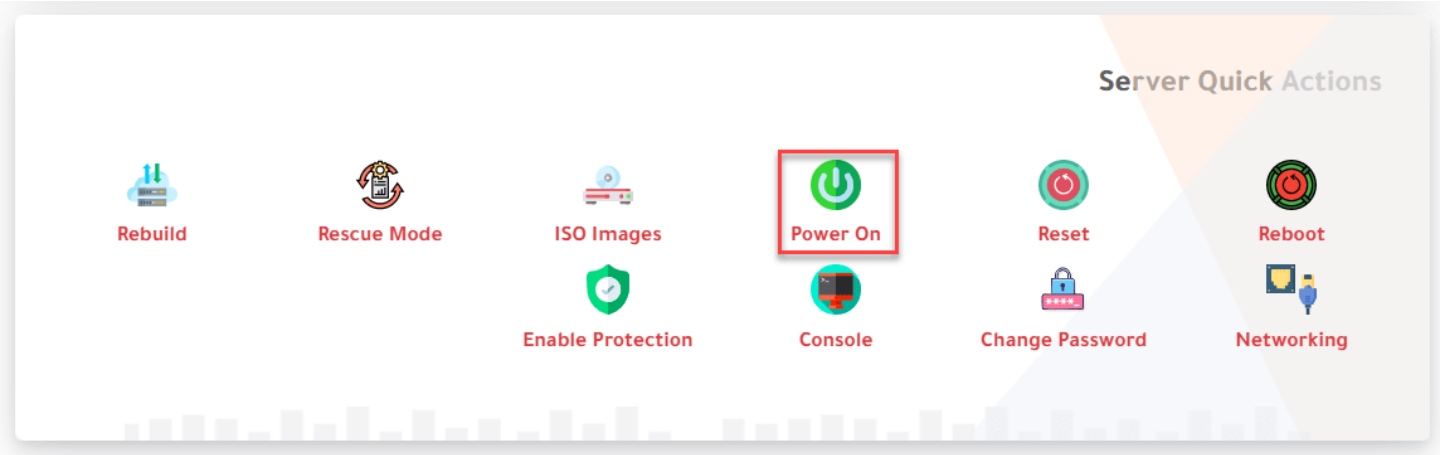

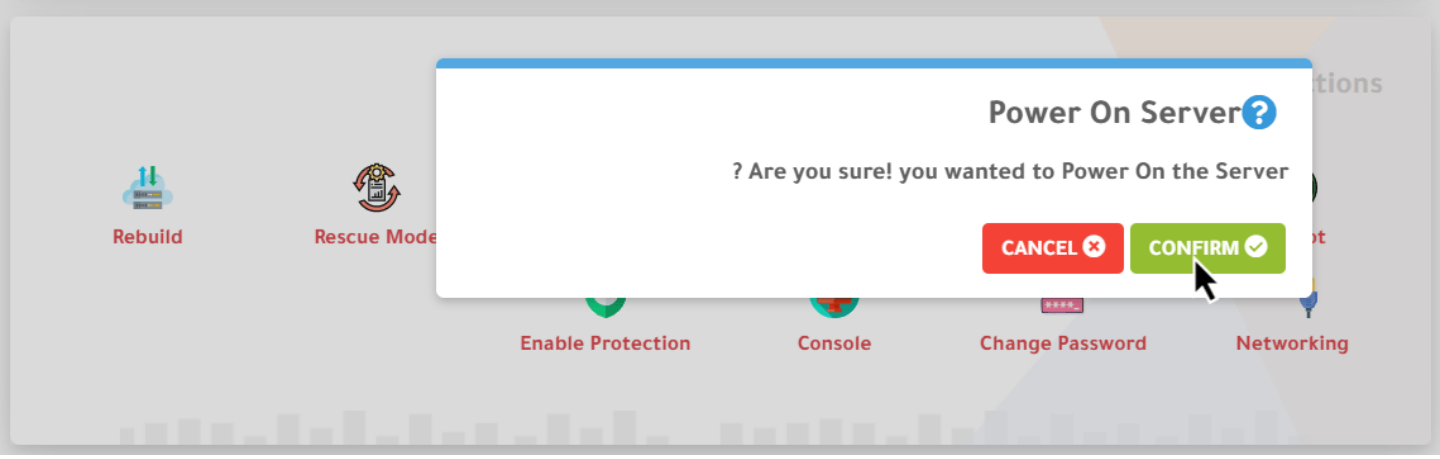

3. Your services appear. Choose the server you want to manage and click **Active**.

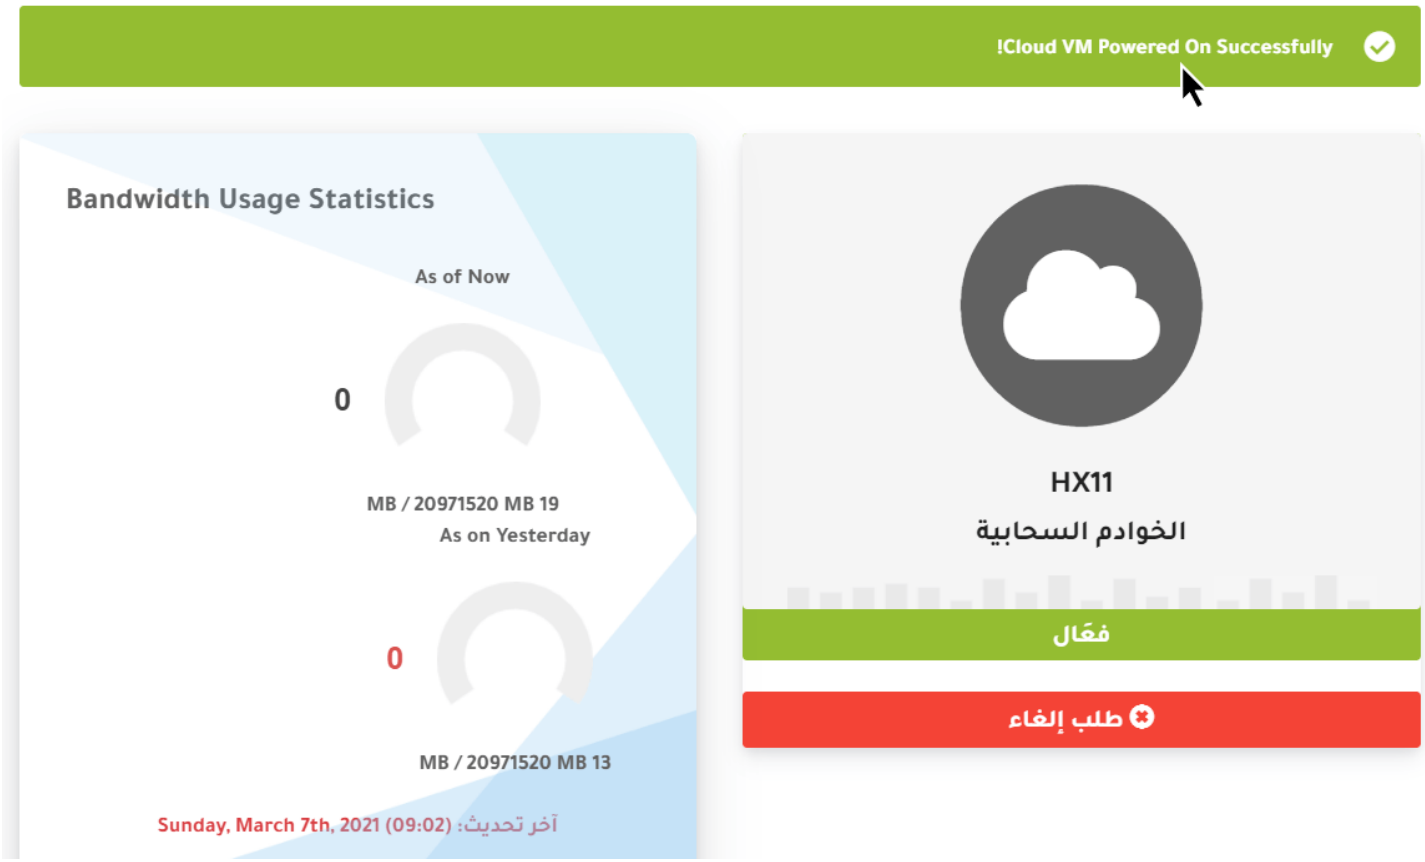

4. Scroll down to **Server Quick Actions** and choose **Power On**. A confirmation message appears; click **Confirm**.

The message reads: "Are you sure! you wanted to Power On the Server?"

5. A message at the top confirms that your server has been powered on.
