How to Reinstall the Operating System (Rebuild) on Your Cloud Server

Explanations of use · https://www.hyyat.com/en/knowledgebase/rebuild-cloud-server-os/

In short: To reinstall your cloud server's OS: client area, then Services, then My Products & Services, then your server, then Server Quick Actions, then Rebuild, then Confirm. Choose the operating system and click Rebuild. Warning: a rebuild permanently deletes all data on the server. Save the one-time password shown afterwards.

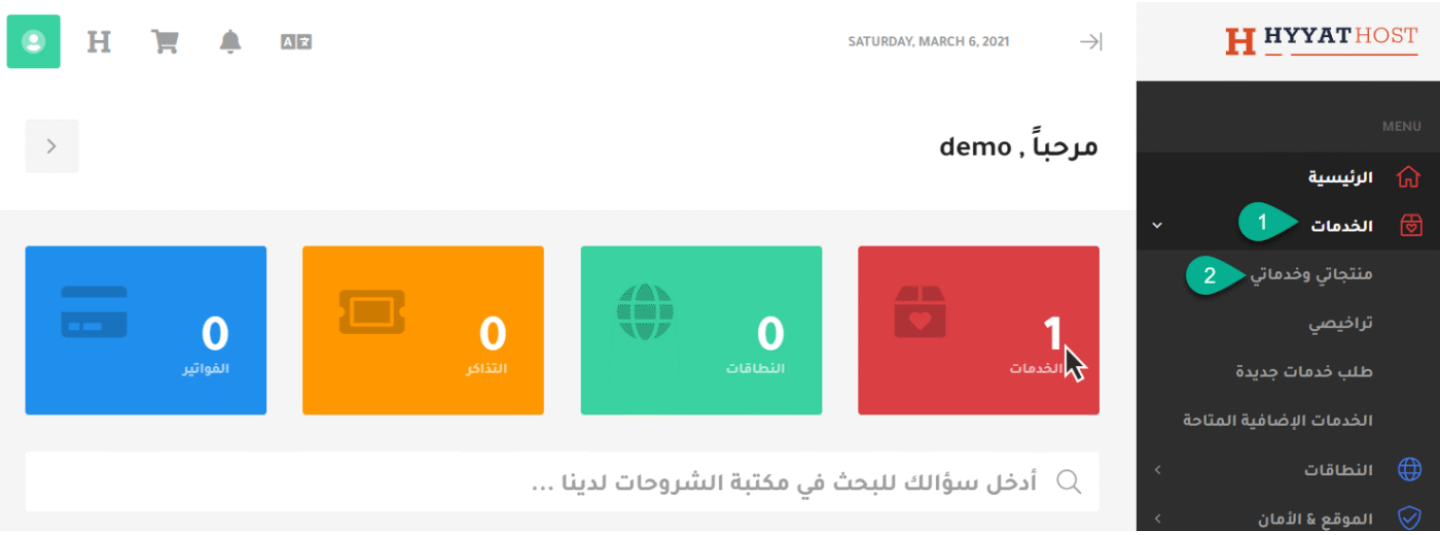

Hyyat Host offers several operating systems you can install on your cloud server. Here is how to reinstall it from the client area.

Steps

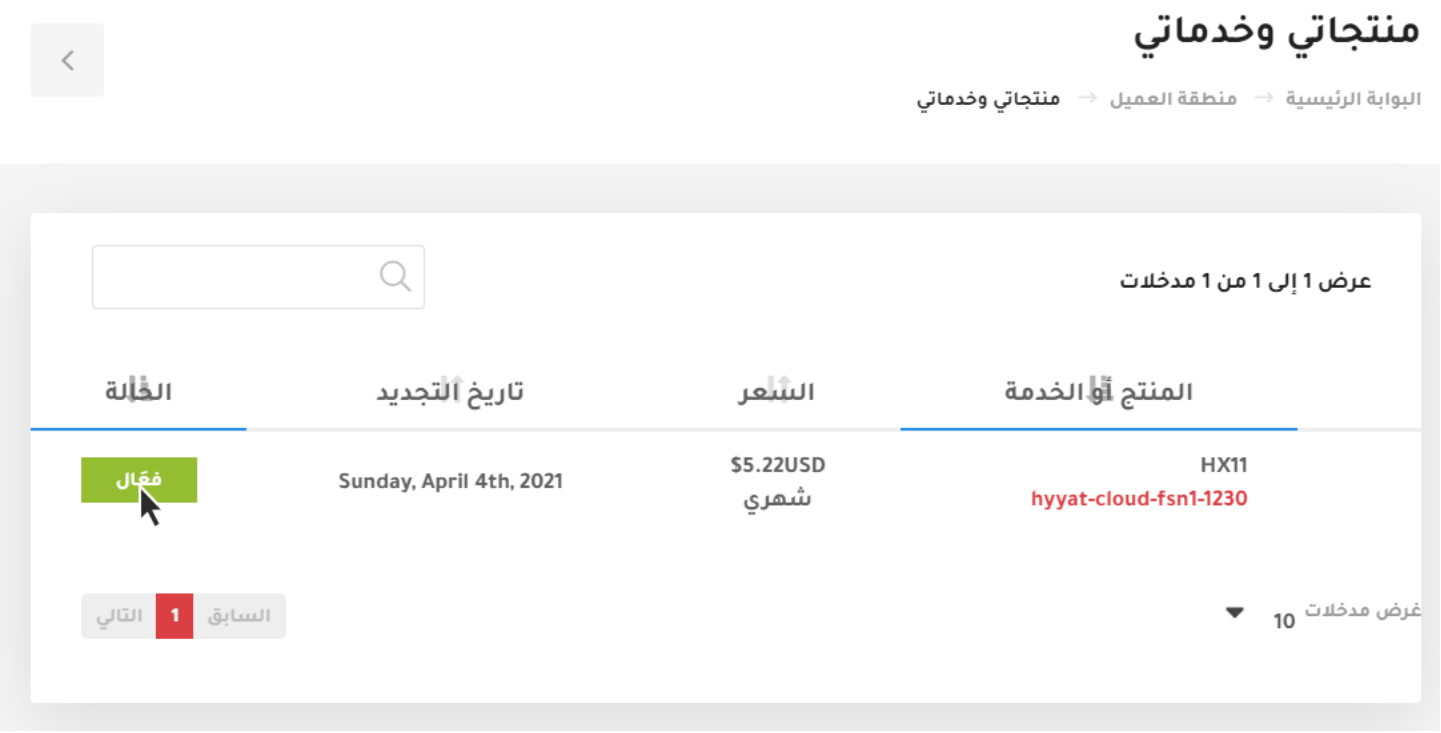

1. Log in to the client area. See how to log in to the client area.

2. Click **Services**, then **My Products & Services**.

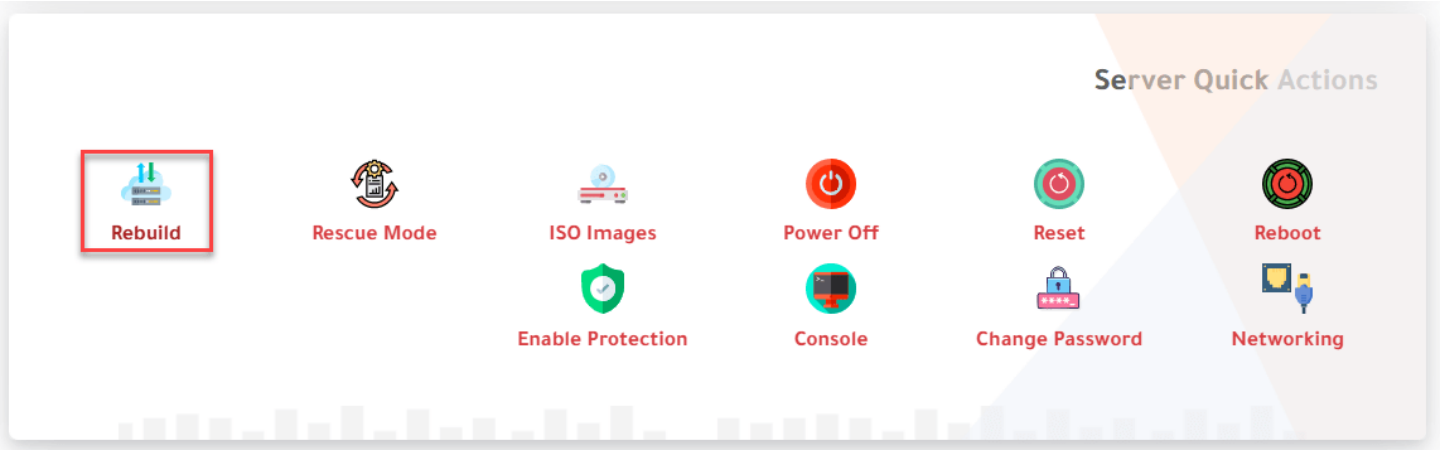

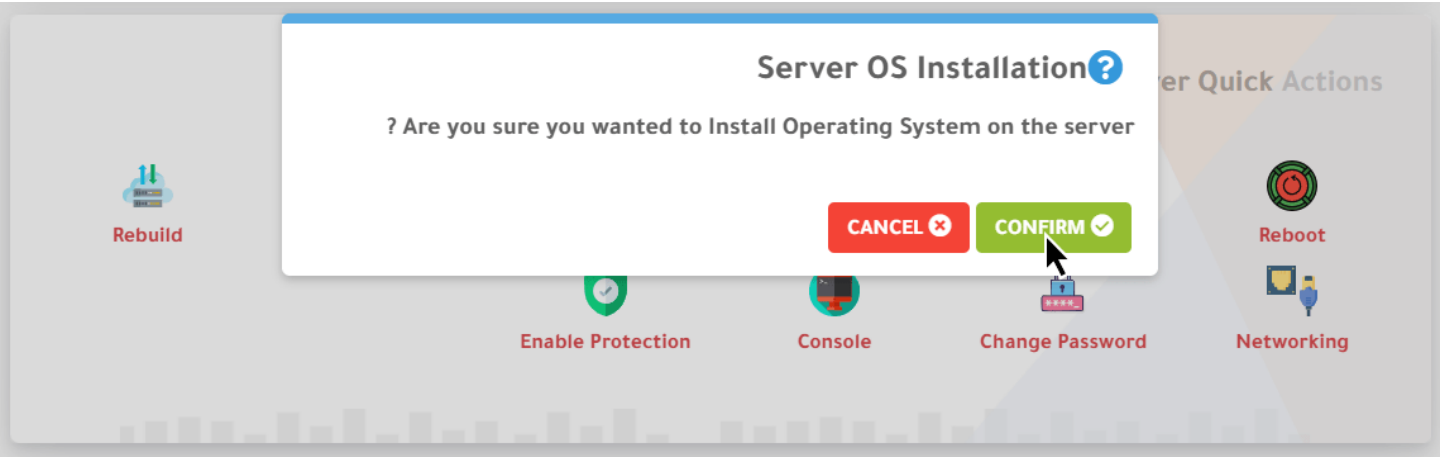

3. Choose the server you want to manage and click **Active**.

4. Scroll down to **Server Quick Actions** and choose **Rebuild**. A confirmation message appears; click **Confirm**.

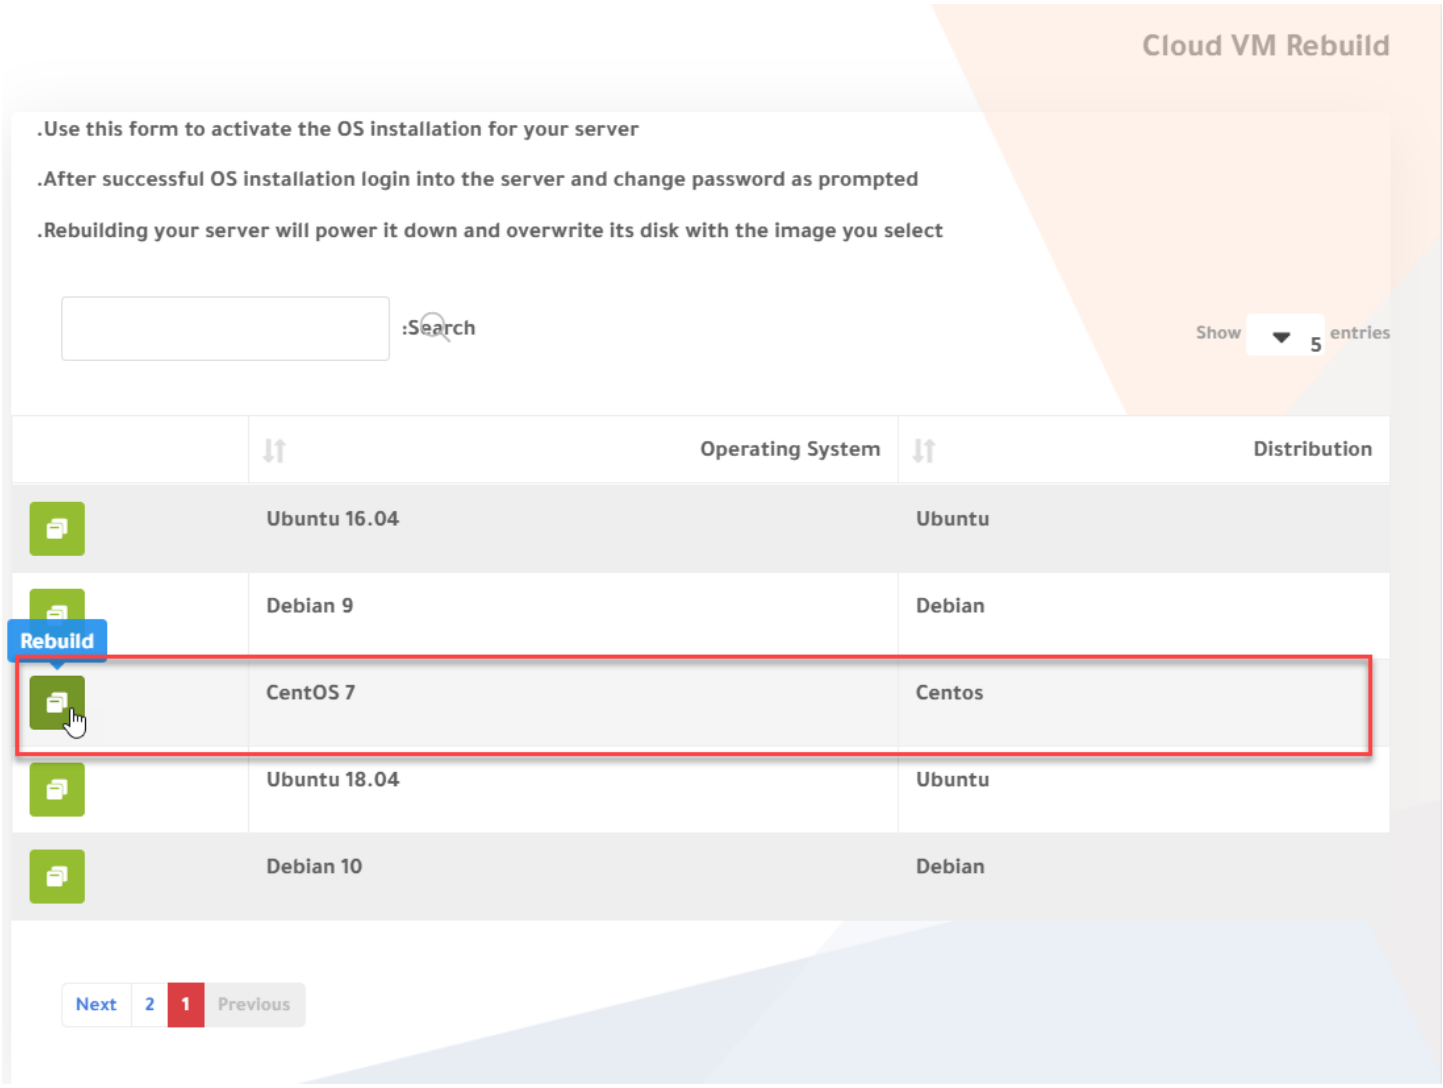

The message reads: "Are you sure you wanted to Install Operating System on the server?"

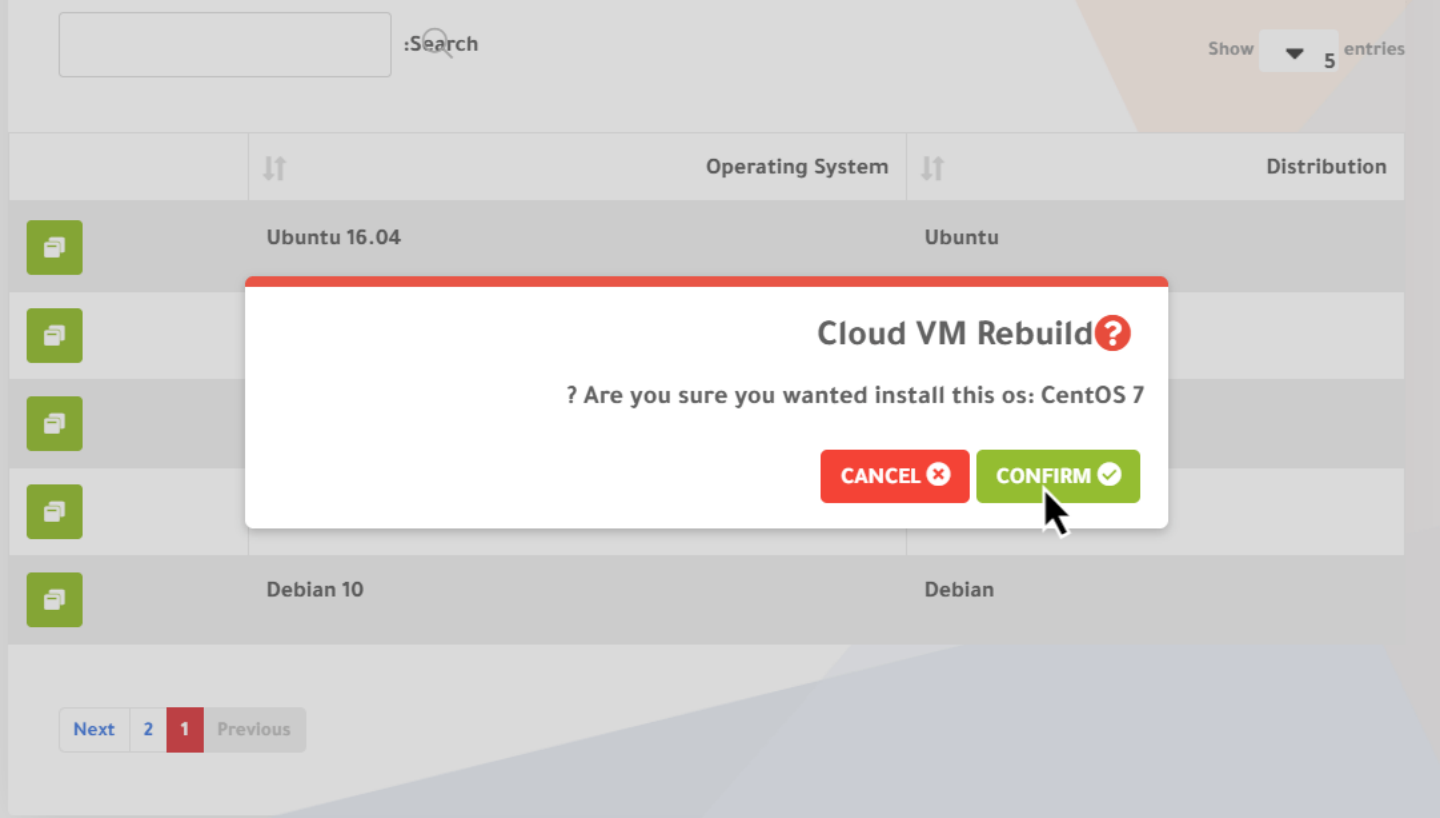

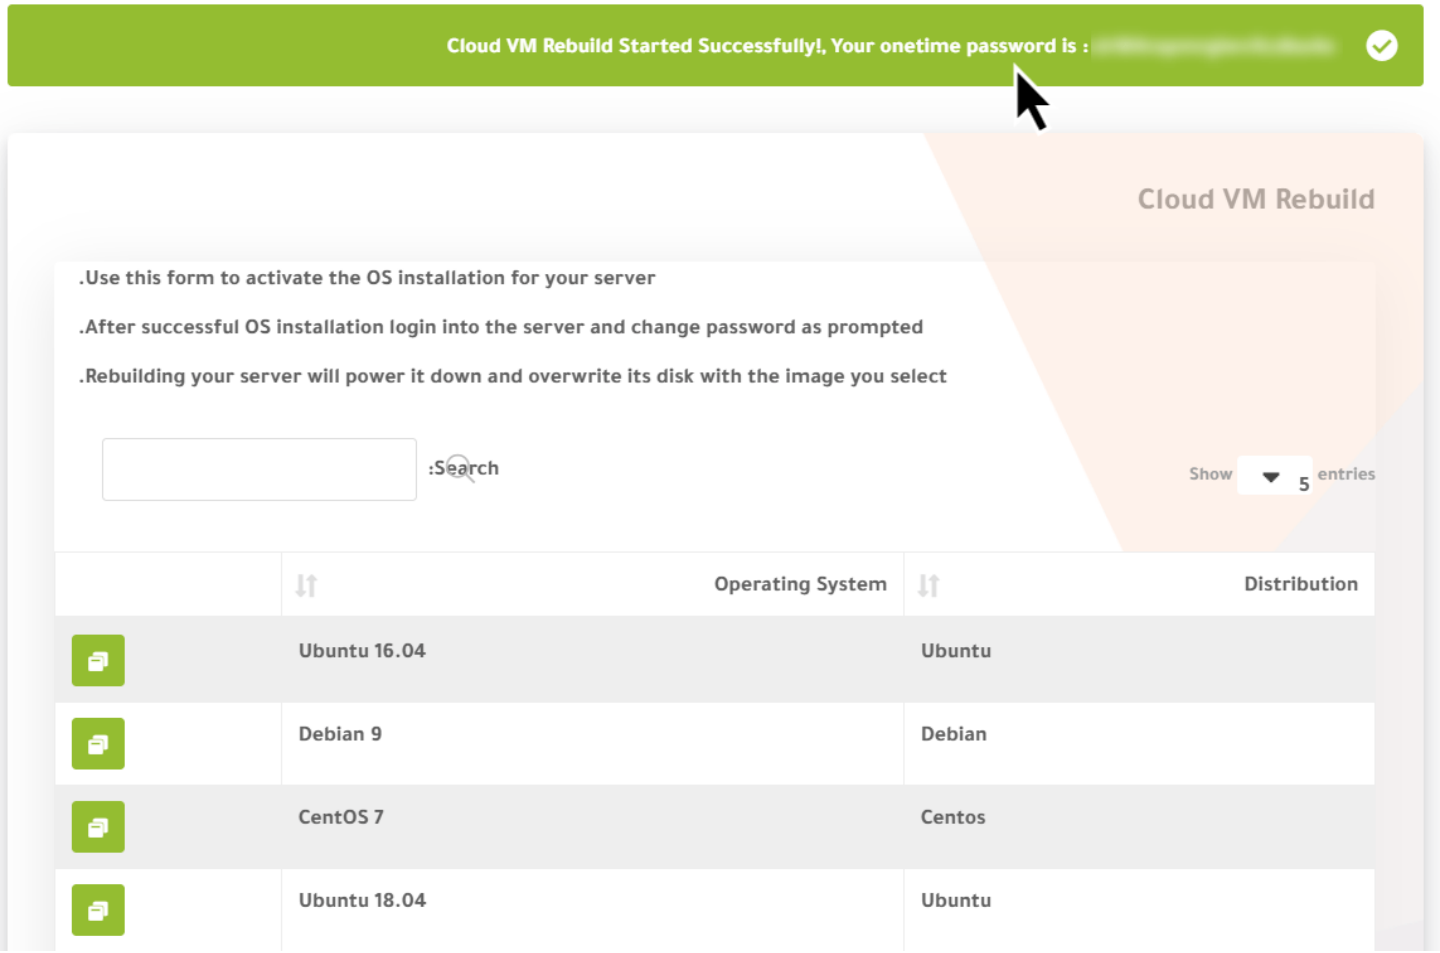

Warning: a rebuild deletes all data on the server permanently, and it cannot be recovered. Back up anything you need first.

5. A list of available operating systems appears. Click **Rebuild** next to the one you want and click **Confirm**.

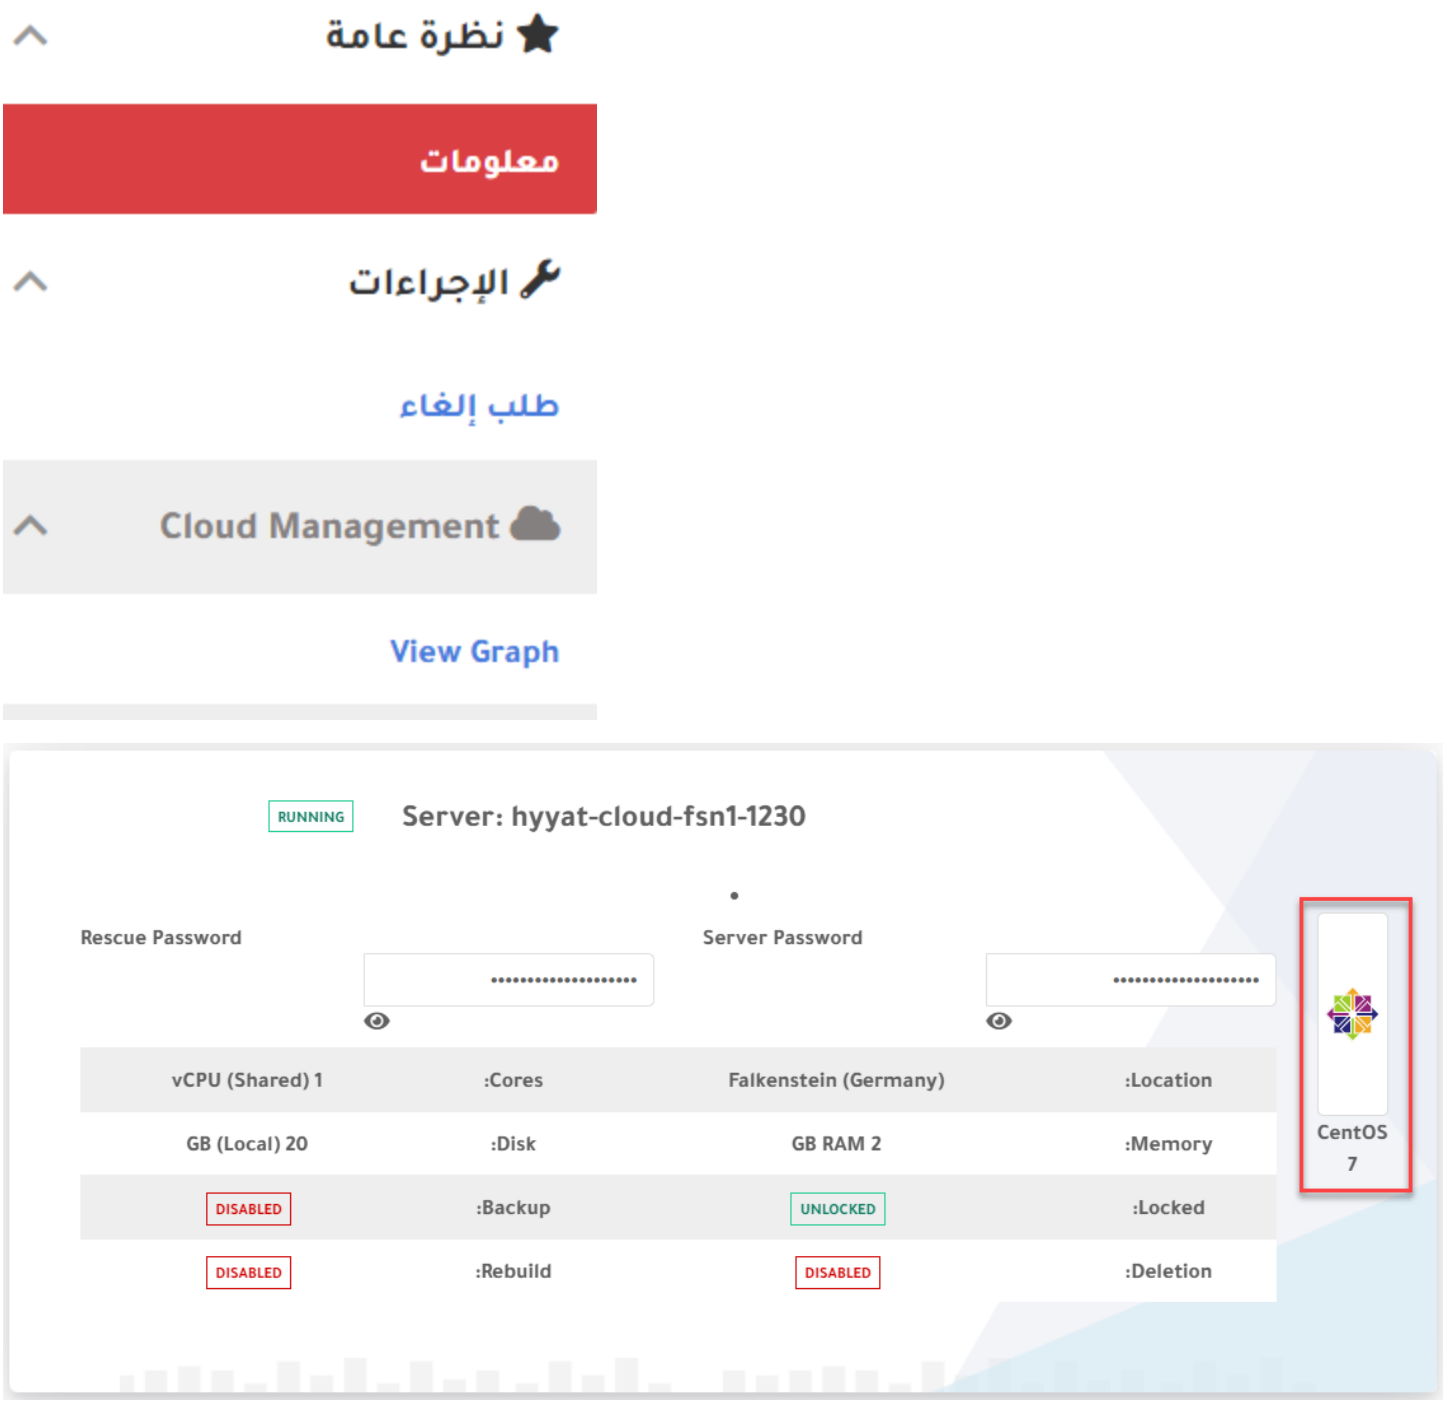

Cloud VM Rebuild
.Use this form to activate the OS installation for your server
.After successful OS installation login into the server and change password as prompted
.Rebuilding your server will power it down and overwrite its disk with the image you select
