How to Reset Your Hyyat Host Client Area Password

Account and Security · https://www.hyyat.com/en/knowledgebase/reset-client-area-password/

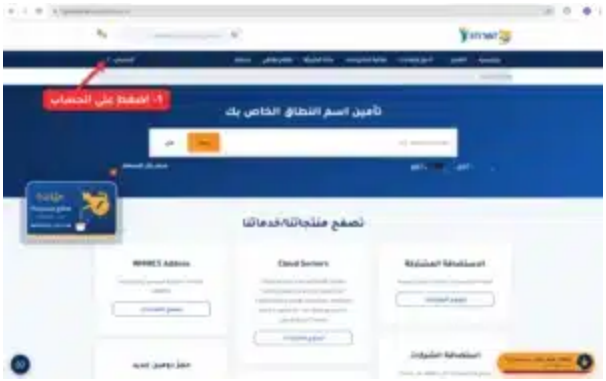

In short If you forgot your Hyyat Host client area password, choose **Forgot Password?**, enter the email registered on your account, and open the reset email. Click the reset link, enter a new strong password twice and save. The link is temporary; if it expires, request a new one.

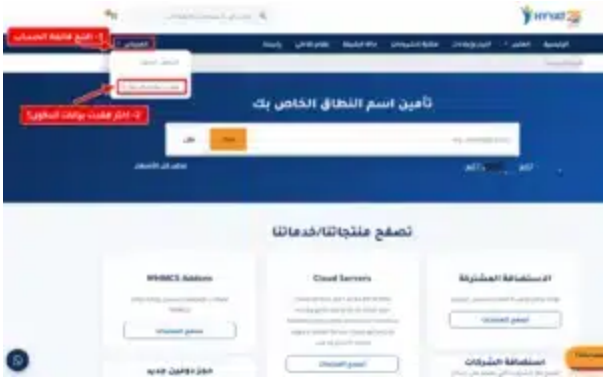

If you forgot your client area password, you can recover your account and set a new password in a few minutes, as long as you can access the email address registered on the account.

Steps to reset your password

1. **Open the Forgot Password page.** In the client area, open the Account menu at the top and choose **Forgot Password?**.

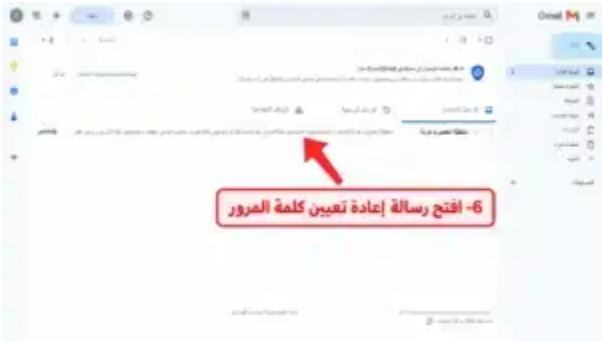

1. **Enter your registered email** in the email field and click **Submit**.

1. **Open the reset email** in your inbox. If it is not there after a few minutes, check the Spam or Junk folder.

1. **Click the reset link** in the email. If the button does not work, copy the link and paste it into your browser's address bar.

Important: the reset link is temporary. If it has expired, request a new one from the Forgot Password page.

1. **Enter a new password twice** and click **Save Changes**. Use a strong password with upper and lower case letters, numbers and at least one symbol, and do not reuse a password from another account.

1. **Log in with the new password.** You will see a confirmation that the password was reset, with a link back to the client area.

If the reset email does not arrive

- Make sure you entered the same email registered on your Hyyat Host account.
- Check the Spam or Junk folder and wait a few minutes before trying again.
- If you no longer have access to the registered email, contact support to verify your identity and update it.

Common mistakes

- Entering an email different from the one registered.
- Using an old reset link that has expired.
- Typing two different passwords in the password and confirm fields.
- Choosing a weak password that does not meet the security requirements.

Security tip: never send your password or any secret details by email or chat, even to support. Just describe the problem. After logging in, turn on two-step verification for your account.

Summary

- Choose Forgot Password? and enter your registered email.
- Open the email and click the reset link before it expires.
- Save a new strong password and log in.
