Show all operations performed through SolusVM control panel

SolusVM . Control Panel

Please follow the following steps

Login to the control panel

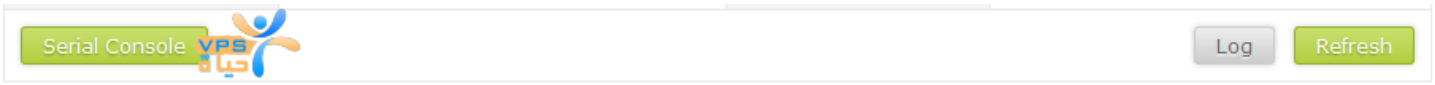

http://xx.xx.xx.xx:5353/login.php

Note: xx.xx.xx.xx is replaced by the main IP that is hosted on the VPN.

- After entering the account information, press the word Login

- Through the main interface of the control panel, press the word Log, as shown

- A table will appear with all the operations that have been executed, each line contains only one operation, and the following are the sections of the table:

The section called Date contains the date and time of the operation

The section called Action contains the event or operation that was performed

The section called IP Address contains the IP of the person who carried out the operation

The section called Status indicates whether the operation has been completed or not

As shown

- After completing the examination and review of the operations that have been performed, the word Back is pressed to return to the main interface of the panel
