How to Transfer Your Domain to Hyyat Host

Domain Management · https://www.hyyat.com/en/knowledgebase/transfer-domain-to-hyyat-host/

In short: To transfer your domain to Hyyat Host: unlock it and turn off privacy at your current registrar, make sure your email is the domain owner email, and get the transfer (EPP) code. Then go to client area → Domains → Transfer Domains to Us, enter the domain and code, and complete the order and payment. A transfer usually takes 5 to 8 days and adds one year to the domain.

Want to see prices first? Start from the domain transfer page.

Before you request a transfer

Before you request a transfer

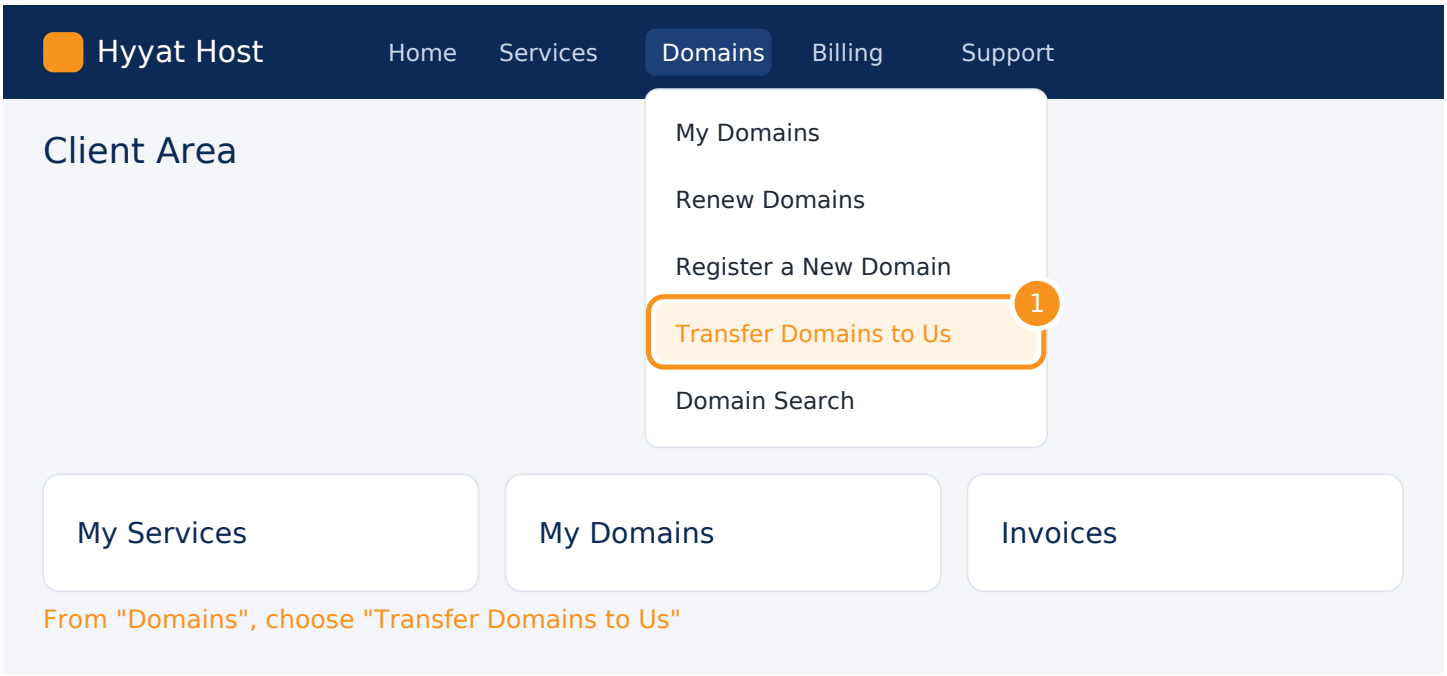

- ✓ **Unlocked at your current registrar**
- ✓ **Privacy protection turned off**
- ✓ **Your email is the domain owner email**
- ✓ **You have the EPP / auth code**
- ✓ **60+ days since registration or transfer**
- ✓ **At least 60 days left before expiry**

Prepare these at the company where your domain is registered now:

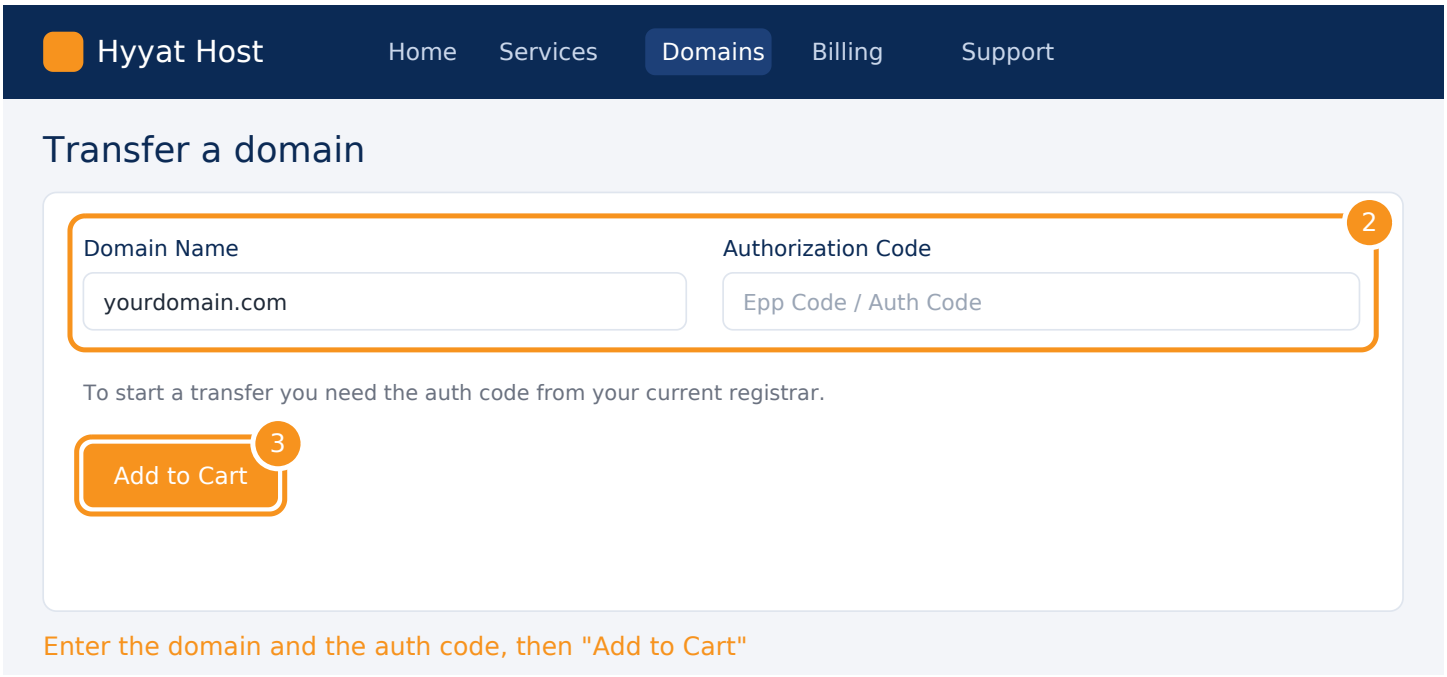

- **The domain is unlocked** at your current registrar.
- **Privacy protection is off**, so the transfer approval email reaches you.
- **Your email is the owner email** on the domain, where the approval email arrives.
- **You have the transfer code** (EPP or Auth Code) from your current registrar.
- **At least 60 days have passed** since registration, the last transfer or the last owner change.
- **At least 60 days remain before expiry.** If it is closer than that, renew it at your current registrar first.

Transfer steps

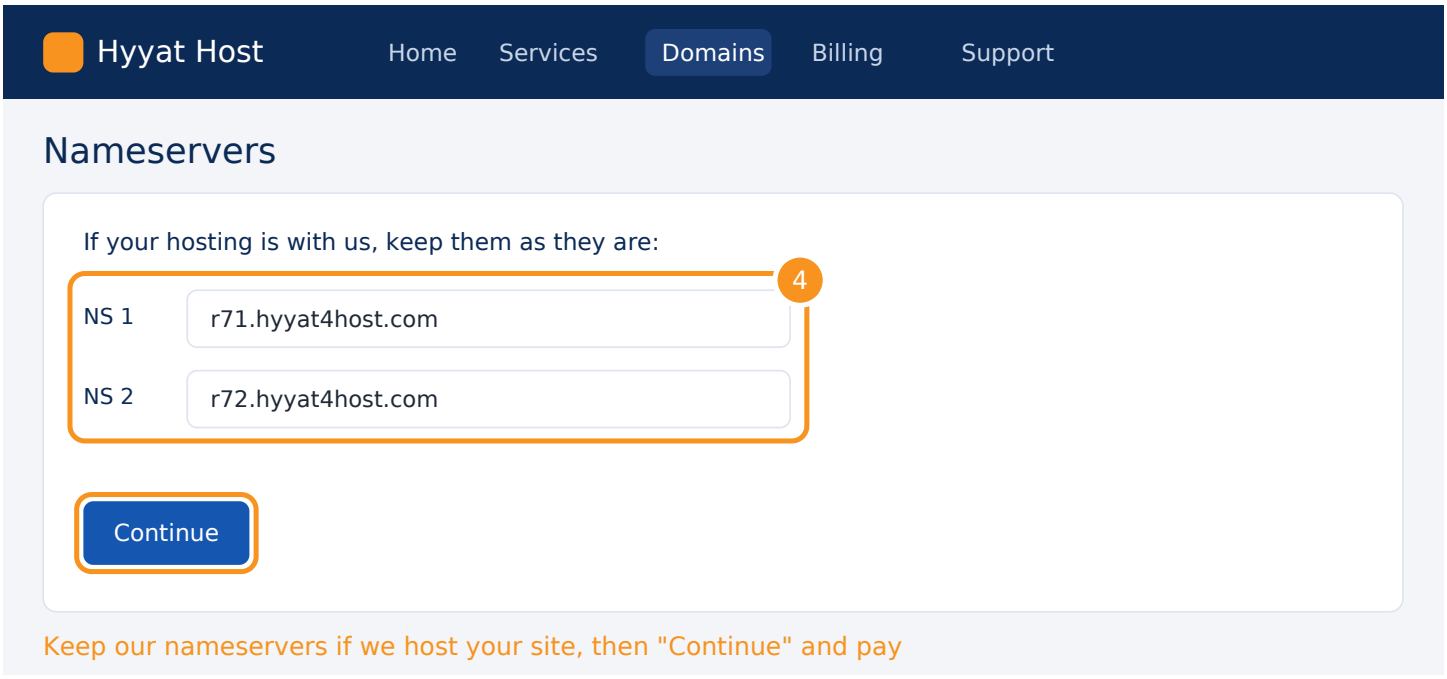

1. Log in to the client area. If you do not have an account, it is created with your first order.
2. From the top menu open **Domains → Transfer Domains to Us**, or open the transfer page directly.

1. Enter the domain name, paste the transfer code in **Authorization Code**, then click **Add to Cart**. If the code field does not appear, send us the code in a ticket after ordering.

1. On the nameservers page: if we host your website, keep `r71.hyyat4host.com` and `r72.hyyat4host.com`. If your hosting is elsewhere, enter its nameservers. Then click **Continue**.
2. Choose a payment method and complete the order. If you pay by bank transfer, open a ticket in Billing & Payments with the receipt.

After ordering

- You may receive an email at the domain owner address asking you to approve the transfer. Approve it so the transfer completes faster.
- A transfer usually takes 5 to 8 days; follow it from My Domains.
- One year is added to the current expiry date, so you keep the remaining time.
- Once it completes, turn on Registrar Lock to protect it.

Saudi .sa domain? Transferring Saudi domains works differently from global ones, so open a support ticket and we will guide you.

FAQ

Will my site stop during the transfer?

Usually not: the transfer does not move your hosting as long as the nameservers are right.

Why was my transfer rejected?

Most often: the domain is still locked, the code is wrong, the owner email did not approve, or 60 days have not passed since registration or the last transfer.

Where do I find the transfer code?

In your current registrar's control panel, or ask their support.

Can I transfer the domain without moving my site?

Yes. Enter your current host's nameservers in the nameservers step.

What should I do after the transfer?

Check the contact information and turn on auto renew if you like.
